

# Contents

Preface .....	vii
Acknowledgments .....	ix
Introduction .....	xi
Section 1 Invasive Studies of the Parameters Regulating Ocular Physiology and Vision	
Chapter 1 "In Vivo" Manometric Studies of the Steady State Intraocular Pressure and the Intraocular Pressure Pulse in Animals and Man.....	3
Chapter 2 The Rate of Formation of the Aqueous Humor .....	11
Chapter 3 The Steady State Intraocular Pressure/Flow Relations in Dead and Living Animal and Human Eyes .....	15
Chapter 4 Homeostasis, Autoregulation, and Relative Ischemia.....	19
Chapter 5 The Pressure/Volume Relation in Eyes of Dead and Living Animal and Human Eyes.....	27
Chapter 6 The Ocular Perfusion Pressure and Its Influence on the Intraocular Pressure Pulse .....	31
Chapter 7 Direct and Indirect Measurements of Ocular Blood Flow in Anesthetized and Conscious Animals and Humans .....	35
Chapter 8 The Morphology and Hydrodynamics of the Chamber Angle Draining the Aqueous Humor .....	41

Chapter 9	The Sympathetic Nerve Innervation of the Eye and the Actions of the Adrenergic Neuron Transmitter Norepinephrine on Intraocular Pressure and Ocular Blood Flow.....	45
Chapter 10	Manometric Studies on the Intraocular Pressure and Vascular Circulation in Ophthalmic Disease .....	55
References.....		59
Section 2	Noninvasive Studies on the IOP, PA, and Blood Flow Autoregulation in Healthy and Diseased Eyes	
Chapter 11	Indirect Measurements of the Intraocular Pressure and the Intraocular Pressure Pulse .....	67
Chapter 12	The Effect of Posture and Corneal Thickness on the Measurement of the Intraocular Pressure .....	71
Chapter 13	The Langham Pneumatic Analogue and Digitized Tonometers .....	77
Chapter 14	The Calibration of the Intraocular Pressure and the Intraocular Pressure Pulse using the Langham Pneumatic Tonometer .....	85
Chapter 15	The Theory of the Langham Tonometer .....	89
Chapter 16	The Intraocular Pressure/Pulse Amplitude Relation in Healthy Animal and Human Eyes .....	91
Chapter 17	The Intraocular Pressure/Pulse Amplitude Relation and Loss of Autoregulation in Ocular Diseases.....	99
Chapter 18	Autoregulation of the Intraocular Pressure and the Ocular Blood Flow .....	117
Chapter 19	The Evaluation of Ocular Ischemia and the Loss of Autoregulation for the Early Detection of Ocular Vascular Diseases .....	121

Chapter 20	The Action of Drugs on Ocular Blood Flow and on the Intraocular Pressure/Pulse Amplitude Relation.....	125
Chapter 21	The Confluence and Integration of Therapies Based on Modulation of the Intraocular Pressure and Ocular Blood Flow .....	131
Chapter 22	Longitudinal Therapeutic Studies .....	137
References.....		141
Section 3	Ophthalmodynamometry, the Ophthalmic Arterial Pressure and the Effect of Increased Vascular Resistance Proximal and Distal to the Ophthalmic Artery on Ocular Blood Flow, the IOP/PA Relation and Vision	
Chapter 23	The Ophthalmic Arterial Pressure, the Intraocular Pressure/Pulse Amplitude Curve, and Their Relations to the Ocular and Cerebral Circulations .....	149
Chapter 24	Ophthalmodynamometry .....	153
Chapter 25	Autoregulation of the Intraocular Pressure and Blood Flow in the Human Eye .....	157
Chapter 26	Objective Measurement of the Diastolic and Systolic Ophthalmic Arterial Pressures .....	159
Chapter 27	The Ophthalmic Arterial Pressure in Healthy Subjects .....	163
Chapter 28	The Relation Between the Ophthalmic Arterial Pressure and the Intraocular Pressure/Pulse Amplitude Relation.....	165
Chapter 29	Modulation of the Intraocular Pressure/Pulse Amplitude Relation in Subjects with Stenosis of the Internal Carotid Artery .....	169
Chapter 30	Alzheimer's Disease and the Eye .....	179
Chapter 31	The Ocular Perfusion Pressure and the Visual Threshold.....	183

**Chapter 32 Concepts and New Perspectives..... 185**

**References..... 187**

**Index ..... 189**
