

Contents

Preface <i>András Prékopa, Emil Molnár</i>	xi
Part I History	
The Revolution of János Bolyai <i>András Prékopa</i>	3
Gauss and non-Euclidean geometry <i>Jeremy Gray</i>	61
János Bolyai's new face <i>Elemér Kiss</i>	81
Part II Axiomataical and Logical Aspects	
Hyperbolic Geometry, Dimension-Free <i>Walter Benz</i>	97
An Absolute Property of Four Mutually Tangent Circles <i>H.S.M. Coxeter</i>	109
Remembering Donald Coxeter <i>Asia Ivic Weiss, William Weiss</i>	115
Axiomatizations of hyperbolic and absolute geometries <i>Victor Pambuccian</i>	119
Logical axiomatizations of space-time. Samples from the literature <i>Hajnal Andréka, Judit X. Madarász and István Németi</i>	155

Part III Polyhedra, Volumes, Discrete Arrangements, Fractals	
Structures in Hyperbolic Space <i>Robert Connolly</i>	189
The Symmetry of Optimally Dense Packings <i>Charles Radin</i>	197
Flexible Octahedra in the Hyperbolic Space <i>Hellmuth Stachel</i>	209
Fractal Geometry On Hyperbolic Manifolds <i>Bernd O. Stratmann</i>	227
A volume formula for generalised hyperbolic tetrahedra <i>Akira Ushijima</i>	249
Part IV Tilings, Orbifolds and Manifolds, Visualization	
The Geometry of Hyperbolic Manifolds of Dimension at least 4 <i>John G. Ratcliffe</i>	269
Real-Time Animation in Hyperbolic, Spherical, and Product Geometries <i>Jeffrey R. Weeks</i>	287
On spontaneous surgery on knots and links <i>A.D. Mednykh, V.S. Petrov</i>	307
Classification of tile-transitive 3-simplex tilings and their realizations <i>E. Molnár — I. Prok — J. Szirmai</i>	321
Part V Differential Geometry	
Non-Euclidean Analysis <i>Sigurdur Helgason</i>	367
Holonomy, geometry and topology of manifolds with Grassmann structure <i>Neda Bokan, Paola Matzeu, Zoran Rakić</i>	385
Hypersurfaces of type number 2 in the hyperbolic four-space <i>Oldřich Kowalski, Masami Sekizawa</i>	407
How far does hyperbolic geometry generalize? <i>János Szenthe</i>	427
Geometry of the point Finsler spaces <i>Lajos Tamásy</i>	445

<i>Contents</i>	ix
Part VI Physics	
Black hole perturbations <i>Zoltán Perjés</i>	465
An Idea Whose Time Has Returned <i>Abraham A. Ungar</i>	487
