

Contents

1	General Discussion of Body Motion in an Ideal Infinite Fluid	1
1.1	Formulation of the Problem	1
1.2	Kinetic Energy of the Fluid	3
1.3	Transformation of Added Masses under a Change of Coordinate System	5
1.4	Force and Torque Influencing a Body Moving in an Ideal Incompressible Fluid	11
1.5	Ellipsoids of Added Masses and Ellipsoids of Added Moments of Inertia	17
2	The Added Masses of Planar Contours Moving in an Ideal Unlimited Fluid	21
2.1	Sedov's Technique	21
2.2	The Added Masses of Simple Contours	23
2.2.1	Elliptic Contour, Circular Contour and Interval (Plate)	23
2.2.2	Elliptic Contour with One Rib, T-shape Contour	23
2.2.3	Elliptic Contour with Two Symmetric Ribs	27
2.2.4	Elliptic Contour with Horizontal and Vertical Ribs	29
2.2.5	Symmetrical Profile Made up of Two Intersecting Intervals (Plates)	32
2.2.6	Circle with Two Hitches	33
2.2.7	Circle with Two Side Ribs	33
2.2.8	Circle with Cross-like Positioned Ribs	34
2.2.9	Circle with Two Tangent Horizontal Ribs	36
2.2.10	Regular Inscribed Polygon	37
2.2.11	Zhukowskii's Foil Profile	37
2.2.12	Arch of the Circle under Different Positions of Coordinate Axes	40
2.2.13	Lense Formed by Two Circular Arches	41
2.2.14	Hexagon, Rectangle, Rhomb, Octagon, Square with Four Ribs	43

2.2.15	Plate with Flap	43
2.3	Added Masses of Lattices	45
2.3.1	Two Plates Located on One Line	45
2.3.2	Three Plates Located on One Line	49
2.3.3	Lattice of Plates	50
2.3.4	Lattice of Rectangles	51
2.4	Added Masses of a Duplicated Shipframe Contour Moving in Unlimited Fluid	51
2.5	Added Masses of an Inclined Shipframe	68
2.6	Added Masses of Catamarans and Twin Rudders	70
3	Added Masses of Three-Dimensional Bodies in Infinite Fluid	81
3.1	Added Masses of an Ellipsoid Moving in an Infinite Fluid	81
3.2	Oblate Spheroid, Elongated Ellipsoid of Revolution, Sphere, Disc and Elliptic Plates	86
3.3	Added Masses of Thin Finite-Span Airfoils	89
3.4	Added Masses of Thin Circular Cylindrical Airfoils	90
3.5	Approximate Methods to Determine Added Masses of 3D Bodies	92
3.5.1	Method of Plane Sections	93
3.5.2	Method of an Equivalent Ellipsoid	101
3.5.3	Approximate Formulas for Added Masses of the Hull	101
4	Added Masses of Interacting Bodies	103
4.1	Added Masses of Interacting Bodies Moving in a Fluid	103
4.1.1	Formulation of the Problem	103
4.1.2	Motion of Two Spheres in an Infinite Fluid	108
4.2	Added Masses of Bodies Moving Close to a Solid Boundary	110
4.2.1	Sphere Moving Close to a Flat Wall	110
4.2.2	Circular Cylinder Moving Near a Flat Wall	111
4.2.3	Elliptic Cylinder Moving Near a Flat Wall	112
4.2.4	Elliptic Cylinder Moving Between Two Flat Walls in the Direction Parallel to the Walls	112
4.2.5	Motion of Parallelepipeds in Infinite Fluid and Between Flat Walls	114
4.2.6	Ellipsoid of Revolution Moving Near a Flat Wall	115
4.2.7	Three-Axial Ellipsoid Moving Near a Flat Wall	117
4.2.8	System of Oblate Ellipsoids of Revolution	119
4.2.9	Infinite Chain of Three-Axial Ellipsoids	121
4.2.10	Sphere in Various Systems (Chains, Lattices)	123
4.2.11	Ellipsoid of Revolution Moving in the Bisecting Plane of a Dihedral Angle	123
4.2.12	Influence of the Boundary and the Free Surface on Added Masses of Foils	127
4.3	Added Masses of Bodies Moving in an Enclosed Space Filled with a Fluid	128

4.3.1	Motion of a Sphere in the Fluid Contained Within a Spherical Concentric Shell	128
4.3.2	Ellipsoid of Revolution Moving in a Fluid Within a Confocal Elliptic Cavity	130
5	Added Masses of Bodies Moving Close to a Free Surface	131
5.1	Boundary Conditions on a Free Surface	131
5.1.1	Boundary Conditions on a Free Surface at Impact of a Floating Body	131
5.1.2	Boundary Conditions on a Free Surface under Periodic Oscillations of a Floating Body	132
5.1.3	Boundary Conditions on a Free Surface when the Method of a Duplicated Model is Applied	135
5.2	Added Masses of Vertical Cylindrical Obstacles	137
5.3	Added Masses of Shipframes when a Ship is Oscillating on a Free Surface	138
5.4	Added Masses of Inclined Ship Frames Rolling on a Free Surface	156
5.5	Added Masses of a Shipframe in Case of Hull Vibration on an Undisturbed Free Surface	157
5.6	Influence of a Free Surface on Added Masses of Submerged Cylinders and Ellipsoids	198
5.6.1	Completely Submerged Sphere	199
5.6.2	Circular Cylinder	200
5.6.3	Ellipsoid of Revolution	201
5.6.4	Elliptic Cylinder	203
5.6.5	Three-Axial Ellipsoid Moving under a Free Surface	203
5.7	Added Masses of Simplest Bodies Floating on a Water Surface	203
5.7.1	Elliptic Cylinder, Circular Cylinder, Wedge and Plate Floating on the Surface of an Unlimited Fluid	205
5.7.2	Sphere and Ellipsoid of Revolution Floating on the Surface of a Fluid of Unlimited Depth	209
5.7.3	Elliptic Cylinder and Plate Floating on a Water Surface near Hard Walls	213
5.7.4	Circular Cylinder Floating on a Free Surface Close to Solid Boundaries at Vertical Impact	221
5.7.5	Ellipsoid of Revolution Floating in an Ellipsoid-Shape Vessel under Vertical Impact	223
5.7.6	Sphere Floating on a Fluid Surface Close to Solid Boundaries under Vertical Impact	225
5.7.7	Disc Floating on a Free Surface Close to Solid Boundaries under Vertical Impact	227
5.7.8	Rectangular Pontoon Floating on a Fluid Surface	229
5.7.9	Rectangular Pontoon Floating Close to Flat Walls	229
5.8	Influence of the Separation of the Flow on a Body Surface on Added Masses	235

5.9	Effect of Fluid Compressibility on Added Masses of a Floating Plate at an Impact	237
5.10	Added Masses of Elliptic Contour under its Lift from a Water Surface	238
5.11	Added Masses of Inland Ships	239
5.12	Added Masses of Barges Consists	246
5.13	Added Masses of Rafts	248
5.14	Influence of Density Stratification of Fluid on Added Masses	248
6	Added Masses under Elastic Oscillations of Structures and Their Components	257
6.1	General Discussion	257
6.2	Methods of Finding Added Masses under Structure Oscillations	258
6.3	Added Masses of Multi-span Plates	260
6.4	Plate Immersed in a Compressible Fluid in the Presence of a Solid Boundary	267
6.5	Added Masses of Ship Hull Grillages and Fields	271
6.6	Added Masses of Cantilever Plates	273
6.7	Added Masses of Shells	274
6.7.1	Cylindrical Shell of Infinite Length	275
6.7.2	Cylindrical Shell of Finite Length	278
6.8	Effect of a Solid Boundary on Added Masses of Shells	281
6.9	Added Masses at Complex Structure Motion	284
6.9.1	Interaction of Plates with Reinforcing Stiffeners	285
6.9.2	Interactions of the Ship Grillage Structural Components	292
6.9.3	Cylindrical Shell Reinforced by Longitudinal Stiffeners	301
6.10	Added Masses of Plates with Cutouts	307
7	Elastic One-Dimensional Oscillations of an Elongated Body in Fluid: Reduction Coefficients	311
7.1	General Discussion	311
7.2	Added Masses of Shipframes under Vibration	313
7.3	Reduction Coefficients of Simplest Elongated Bodies Vibrating in Transverse Direction	315
7.3.1	Reduction Coefficients for a Circular Cylinder under Transversal Oscillations	315
7.3.2	Reduction Coefficients for a Vibrating Elliptic Cylinder	317
7.3.3	Reduction Coefficients for a Vibrating Rectangular Pontoon	317
7.3.4	Reduction Coefficients for Vibrating Ellipsoid of Revolution	320
7.3.5	Added Moments of Inertia under Torsional Oscillations of the Hull	324
7.4	Influence of Shallow Water on Added Masses of a Hull under Vertical Vibrations	326

- 8 Added Masses of a Propeller 333**
 - 8.1 Forces and Torques of Inertial Nature Acting on a Propeller 333
 - 8.2 Added Masses of Propeller Blades 336
 - 8.3 Added Masses of a Propeller under Transversal Oscillations of
Shafting 343
 - 8.4 Added Masses of a Propeller in a Shroud 347
 - 8.5 Influence of a Boundary on Added Masses of a Propeller 347
 - Disc Moving Near a Flat Boundary 351
 - Propeller with Blade-Area Ratio 1.08 Moving Near Flat
Boundary 352
 - Propeller with Blade-Area Ratio 0.61 Moving Near Flat
Boundary 352
 - Propeller with Blade-Area Ratio 0.61 Moving Near Flat
Boundary with a Channel 353

- 9 Methods for Experimental Determination of Added Masses 355**
 - 9.1 Method of Small Oscillations 355
 - 9.2 Small Oscillations for Determining Added Masses of Bodies
Floating on Water Surface 356
 - 9.3 Experimental Method of Determining Added Mass of a Ship at
Acceleration and Deceleration 359
 - 9.4 Experimental Determination of Added Masses of Vibrating
Models 360
 - 9.5 Determination of Added Mass Coefficients by Methods of
Electromagnetic Modeling 363
 - 9.5.1 Added Masses of Planar Contours 365
 - 9.5.2 Added Masses of 3D Bodies 367
 - 9.5.3 Determination of Added Masses on the Basis of
Magneto-hydrodynamic Analogy (MHDA) 369
 - 9.5.4 Some Data on Added Masses of Planar Contours
Determined Using EHDA Method 370
 - 9.6 On Numerical Methods of Computation of Added Masses 372

- Bibliography 381**
