
Contents

1	Introduction	1
1.1	Need for Applied Reliability and Quality.....	1
1.2	Reliability and Quality History.....	1
1.3	Reliability and Quality Terms and Definitions.....	3
1.4	Useful Information on Applied Reliability and Quality	4
1.5	Problems	9
	References	10
2	Reliability and Quality Mathematics	13
2.1	Introduction	13
2.2	Arithmetic Mean, Mean Deviation, and Standard Deviation	14
2.3	Some Useful Mathematical Definitions and Formulas.....	16
2.4	Boolean Algebra Laws and Probability Properties.....	20
2.5	Probability-related Mathematical Definitions	22
2.6	Statistical Distributions	23
2.7	Problems	28
	References	29
3	Introduction to Reliability and Quality	31
3.1	Introduction	31
3.2	Bathtub Hazard Rate Concept and Reliability Basic Formulas	31
3.3	Reliability Evaluation of Standard Configurations.....	34
3.4	Reliability Analysis Methods	41
3.5	Quality Goals, Quality Assurance System Elements, and Total Quality Management	47
3.6	Quality Analysis Methods	49
3.7	Quality Costs and Indices	54
3.8	Problems.....	56
	References	56

4	Robot Reliability	59
4.1	Introduction	59
4.2	Terms and Definitions	59
4.3	Robot Failure Causes and Classifications.....	60
4.4	Robot Reliability Measures	62
4.5	Robot Reliability Analysis Methods.....	66
4.6	Models for Performing Robot Reliability and Maintenance Studies	67
4.7	Problems	76
	References	76
5	Medical Equipment Reliability	79
5.1	Introduction	79
5.2	Medical Equipment Reliability-related Facts and Figures.....	79
5.3	Medical Devices and Classification of Medical Devices/Equipment.....	80
5.4	Medical Equipment Reliability Improvement Procedures and Methods	81
5.5	Human Error in Medical Equipment	84
5.6	Useful Guidelines for Reliability and Other Professionals to Improve Medical Equipment Reliability	86
5.7	Medical Equipment Maintenance and Maintainability.....	87
5.8	Organizations and Sources for Obtaining Medical Equipment Failure-related Data	92
5.9	Problems	93
	References	94
6	Power System Reliability	97
6.1	Introduction	97
6.2	Terms and Definitions	97
6.3	Service Performance Indices	98
6.4	Loss of Load Probability	100
6.5	Models for Performing Availability Analysis of a Single Generator Unit.....	100
6.6	Models for Performing Availability Analysis of Transmission and Associated Systems	107
6.7	Problems	113
	References	114
7	Computer and Internet Reliability	115
7.1	Introduction	115
7.2	Computer System Failure Causes and Reliability Measures	116
7.3	Comparisons Between Hardware and Software Reliability.....	117
7.4	Fault Masking.....	117
7.5	Computer System Life Cycle Costing	121
7.6	Software Reliability Evaluation Models.....	124

7.7	Internet Reliability, Failure Examples, Outage Categories, and Related Observations	126
7.8	An Approach for Automating Fault Detection in Internet Services	128
7.9	Internet Reliability Models	129
7.10	Problems	132
	References	133
8	Quality in Health Care	137
8.1	Introduction	137
8.2	Health Care Quality Terms and Definitions and Reasons for the Rising Health Care Cost.....	138
8.3	Comparisons of Traditional Quality Assurance and Total Quality Management with Respect to Health Care and Quality Assurance Versus Quality Improvement in Health Care Institutions.....	139
8.4	Assumptions Guiding the Development of Quality Strategies in Health Care, Health Care-related Quality Goals and Strategies, Steps for Quality Improvement, and Physician Reactions to Total Quality.....	141
8.5	Quality Tools for Use in Health Care	144
8.6	Implementation of Six Sigma Methodology in Hospitals and Its Potential Advantages and Implementation Barriers.....	147
8.7	Problems	149
	References	150
9	Software Quality	151
9.1	Introduction	151
9.2	Software Quality Terms and Definitions	151
9.3	Software Quality Factors and Their Subfactors.....	152
9.4	Useful Quality Tools for Use During the Software Development Process	154
9.5	A Manager's Guide to Total Quality Software Design	156
9.6	Software Quality Metrics	158
9.7	Software Quality Cost	161
9.8	Problems.....	162
	References	163
10	Quality Control in the Textile Industry	165
10.1	Introduction	165
10.2	Quality-related Issues in Textiles and Quality Problems Experienced in Apparel	166
10.3	Fibres and Yarns.....	167
10.4	Textile Quality Control Department Functions	168
10.5	Textile Test Methods	169
10.6	Quality Control in Spinning and Fabric Manufacture	170

10.7	Quality Control in Finishing and in the Clothing Industry	171
10.8	Organizations that Issue Textile Standards.....	173
10.9	Problems.....	174
	References	174
11	Quality Control in the Food Industry	175
11.1	Introduction	175
11.2	Factors Affecting Food Quality and Basic Elements of a Food Quality Assurance Program.....	176
11.3	Total Quality Management Tools for Application in the Food Industry.....	177
11.4	Hazard Analysis and Critical Control Points (HACCP) Concept.....	179
11.5	Fruits and Vegetables Quality	181
11.6	Vending Machine Food Quality	182
11.7	Food Processing Industry Quality Guidelines	184
11.8	Problems.....	186
	References	186
	Appendix.....	189
A.1	Introduction	189
A.2	Publications	189
	Author Biography	241
	Index	243
