1	Introduction	1
1.1	Maintenance	2
1.2	Redundancy	3
1.3	Applications	4
1.4	Further Studies	5
2	Redundant Models	7
2.1	Parallel Systems	8
2.1.1	Number of Units and Replacement Time	8
2.1.2	Replacement Number of Failed Units	13
2.2	Series and Parallel Systems	17
2.2.1	Series-parallel System	17
2.2.2	Parallel-series System	20
2.2.3	Complexity of Series-parallel System	23
2.3	Three Redundant Systems	23
2.3.1	Reliability Quantities	24
2.3.2	Expected Costs	27
2.3.3	Reliabilities with Working Time	28
2.4	Redundant Data Transmissions	30
2.4.1	Three Models	30
2.4.2	Optimum Policies	32
2.5	Other Redundant Models	34
3	Partition Policies	39
3.1	Maintenance Models	40
3.1.1	Inspection Polices	40
3.1.2	Replacement Policies	42
3.2	Partition Models	47
3.3	Job Execution with Signature	52

4	Maintenance Policies for a Finite Interval	59
4.1	Imperfect PM Policies	60
4.1.1	Periodic PM	61
4.1.2	Sequential PM	62
4.2	Inspection Policies	64
4.2.1	Periodic Inspection	65
4.2.2	Sequential Inspection	66
4.2.3	Asymptotic Inspection	66
4.3	Cumulative Damage Models	69
4.3.1	Periodic PM	73
4.3.2	Sequential PM	74
5	Forward and Backward Times in Reliability Models	77
5.1	Forward Time	78
5.2	Age Replacement	79
5.3	Reliability with Scheduling	82
5.4	Backward Time	86
5.4.1	Optimum Backward Times	88
5.4.2	Traceability	92
5.5	Checking Interval	94
5.6	Inspection for a Scale	97
6	Optimum Retrial Number of Reliability Models	101
6.1	Retrial Models	102
6.2	Bayesian Estimation of Failure Probability	107
6.3	ARQ Models with Intermittent Faults	110
6.3.1	Model 1	110
6.3.2	Model 2	113
6.3.3	Model 3	116
7	Optimum Checkpoint Intervals for Fault Detection	123
7.1	Checkpoint Intervals of Redundant Systems	125
7.2	Sequential Checkpoint Intervals	131
7.3	Modified Checkpoint Models	138
7.3.1	Double Modular System with Spare Process	138
7.3.2	Three Detection Schemes	141
8	Maintenance Models with Two Variables	149
8.1	Three Replacement Models	150
8.1.1	Age Replacement	150
8.1.2	Periodic Replacement	157
8.1.3	Block Replacement	173
8.2	Modified Replacement Policies	174

8.3	Other Maintenance Models	178
8.3.1	Parallel System	178
8.3.2	Inspection Policies	181
9	System Complexity and Entropy Models	187
9.1	System Complexity	188
9.1.1	Definition of Complexity	188
9.1.2	Reliability of Complexity	190
9.2	System Complexity Considering Entropy	195
9.2.1	Definition of Complexity	195
9.2.2	Reliability of Complexity	196
9.3	Entropy Models	199
10	Management Models with Reliability Applications	205
10.1	Service Reliability	206
10.2	Optimization Problems in ATMs	209
10.2.1	Maintenance of ATMs	209
10.2.2	Number of Spare Cash-boxes	215
10.3	Loan Interest Rate	221
10.3.1	Loan Model	222
10.4	CRL Issue in PKI Architecture	226
10.4.1	CRL Models	228
