

Contents

1	The Problems of Advanced Ischemic Heart Disease: Epidemiology, Growth Rate, Burden, and Costs of AIHD.	1
	James J. Ferguson and Dipsu Patel	
2	Imaging for Viable and Ischemic Myocardium: Value of Assessment of Viable and Ischemic Myocardium and Techniques Such as MRI, Radionuclide Imaging.	13
	Catalin Loghin and K. Lance Gould	
3	Sudden Cardiac Death in Advanced Ischemic Heart Disease: Epidemiology, Etiology, and Defibrillator Therapy	37
	Zian H. Tseng, Nitish Badhwar and Teresa De Marco	
4	Pacemaker Therapy for Advanced Ischemic Heart Disease: Explanation of Cardiac Resynchronization Therapy and Its Role in Treating AIHD	49
	John P. Boehmer	
5	The Role of Percutaneous Coronary Revascularization in Advanced Ischemic Heart Disease: Modern Angioplasty and Stent Technology; Technique, Application and Efficacy, Comparison to Surgical	69
	Richard W. Smalling and Gregory M. Geisler	
6	Percutaneous Mechanical Assist Devices: Currently Available Devices, Their Indications and Usages, Patient Selection and Management	85
	Harvinder Singh Arora and Reynolds Delgado	
7	Cellular Implantation Therapy: Current Studies, Different Strategies and Potential Applications	93
	Emerson C. Perin, Guilherme V. Silva and James T. Willerson	

**8 The Future of Treatment of Advanced Ischemic Heart Disease:
New Technologies and Strategies Being Studied and Their Potential
Impact on the Disease** 129
John L. Jefferies, Marianne Bergheim and Reynolds Delgado
