1 Informatics Platform for Designing and Deploying e-Manufacturing Systems	1
---	---

Jay Lee, Linxia Liao, Edzel Lapira, Jun Ni, Lin Li

1.1	Introduction	1
1.2	Systematic Methodology in Prognostics Design for e-Manufacturing.....	5
1.2.1	Overview of 5S Methodology.....	5
1.2.2	The 1st S – Streamline.....	8
1.2.3	The 2nd S – Smart Processing	10
1.2.4	The 3rd S – Synchronise.....	11
1.2.5	The 4th S – Standardise	13
1.2.6	The 5th S – Sustain	13
1.3	Informatics Platform for Implementing e-Manufacturing Applications.....	14
1.3.1	Modularised Prognostics Toolbox – Watchdog Agent Toolbox	15
1.3.2	Automatic Tool Selection	17
1.3.3	Decision Support Tools for the System Level	19
1.3.4	Implementation of the Informatics Platform.....	21
1.4	Industrial Case Studies	23
1.4.1	Case Study 1 – Chiller Predictive Maintenance.....	23
1.4.2	Case Study 2 – Spindle Bearing Health Assessment	26
1.4.3	Case Study 3 – Smart Machine Predictive Maintenance	29
1.5	Conclusions and Future Work	33
	References.....	34

2 A Framework for Integrated Design of Mechatronic Systems	37
---	----

Kenway Chen, Jonathan Bankston, Jitesh H. Panchal, Dirk Schaefer

2.1	Introduction	37
2.2	State of the Art and Research Gaps	40
2.2.1	Product Data Management.....	40
2.2.2	Formats for Standardised Data Exchange.....	41

2.2.3	The NIST Core Product Model.....	42
2.2.4	Multi-representation Architecture.....	43
2.2.5	Constraint-based Techniques.....	44
2.2.6	Active Semantic Networks	45
2.2.7	Summary and Research Gap Analysis.....	46
2.3	An Approach to Integrated Design of Mechatronic Products.....	48
2.3.1	Modelling Mechatronic Systems	48
2.3.2	Constraint Classification in Mechanical Domain	49
2.3.3	Constraint Classification in Electrical Domain.....	52
2.4	Illustrative Example: a Robot Arm.....	53
2.4.1	Overview of the Robot Arm	53
2.4.2	Modelling Constraints for SG5-UT	55
2.5	Requirements for a Computational Framework for Integrated Mechatronic Systems Design	59
2.5.1	Electrical Design.....	59
2.5.2	Mechanical and Electronic Design	64
2.5.3	Integrated Design.....	64
2.6	Conclusions	68
	References.....	68

3 Fine Grain Feature Associations in Collaborative Design and Manufacturing – A Unified Approach 71

Y.-S. Ma, G. Chen, G. Thimm

3.1	Introduction	71
3.2	Literature Review	72
3.2.1	Geometric Relations	72
3.2.2	Non-geometric Relations	73
3.3	Unified Feature.....	74
3.3.1	Fields	76
3.3.2	Methods	77
3.4	Entity Associations.....	78
3.4.1	Implementing the Constraint-based Associations.....	80
3.4.2	Implementing the Sharing Associations	80
3.4.3	Evaluation of Validity and Integrity of Unified Feature Model.....	82
3.4.4	Algorithms for Change Propagation	82
3.5	Multiple View Consistency	85
3.5.1	Cellular Model.....	85
3.5.2	Using Cellular Topology in Feature-based Solid Modelling	85
3.5.3	Extended Use of Cellular Model	88
3.5.4	Characteristics of the Unified Cellular Model.....	89
3.5.5	Two-dimensional Features and Their Characteristics.....	91
3.5.6	Relation Hierarchy in the Unified Cellular Model.....	92
3.6	Conclusions	94
	References.....	95

4 Collaborative Supplier Integration for Product Design and Development	99
<i>Dunbing Tang, Kwai-Sang Chin</i>	
4.1 Introduction	99
4.2 Different Ways of Supplier Integration	101
4.3 Know-how Sharing for Supplier Integration	104
4.4 Collaboration Tools for Supplier Integration.....	105
4.5 System Development.....	108
4.6 Conclusions	115
Acknowledgement	115
References.....	115
5 Reconfigurable Manufacturing Systems Design for a Contract Manufacturer Using a Co-operative Co-evolutionary Multi-agent Approach	117
<i>Nathan Young, Mervyn Fathianathan</i>	
5.1 Introduction	117
5.2 Related Research	118
5.3 Co-operative Co-evolutionary Multi-agent Approach to Reconfigurable Manufacturing Systems Design	120
5.4 Application of Approach to Reconfigurable Milling Machines	122
5.4.1 Solution Representation.....	122
5.4.2 Solution Evaluation	123
5.4.3 Synthesising Machine Architecture Using an Evolutionary Algorithm.....	129
5.5 Case Example	131
5.6 Conclusions	134
References.....	135
6 A Web and Virtual Reality-based Platform for Collaborative Product Review and Customisation	137
<i>George Chryssolouris, Dimitris Mavrikios, Menelaos Pappas, Evangelos Xanthakis, Konstantinos Smparounis</i>	
6.1 Introduction	137
6.2 Collaborative Manufacturing Environment Framework.....	139
6.3 Collaborative Product Reviewer.....	141
6.4 Platform Design.....	142
6.4.1 Platform Architecture	142
6.4.2 Communication	143
6.5 Platform Implementation and Functionality	143
6.5.1 Collaboration Platform	145
6.5.2 Virtual Reality Viewer.....	146
6.5.3 Augmented Reality Viewer	147
6.6 A Textiles Industry Use Case	147
6.7 Conclusions	150

Acknowledgement	151
References.....	151
7 Managing Collaborative Process Planning Activities through Extended Enterprise	153
<i>H. R. Siller, C. Vila, A. Estruch, J. V. Abellán, F. Romero</i>	
7.1 Introduction	153
7.2 Review of Collaborative and Distributed Process Planning	156
7.3 ICT Functionalities for Collaboration	158
7.3.1 Basic Requirements for Knowledge, Information and Data Management	159
7.3.2 Basic Requirements for Workflow Management.....	161
7.3.3 Product Lifecycle Management Tools for Collaboration.....	164
7.4 Reference Model for Collaborative Process Planning.....	165
7.5 Collaborative Process Planning Activities Modelling	167
7.5.1 Use Cases Modelling	168
7.5.2 Sequence Diagrams Modelling	170
7.5.3 Workflow Modelling	171
7.6 Implementation of ICT Reference Architecture	175
7.7 Case Study.....	177
7.7.1 Setup of a Collaborative Environment.....	177
7.7.2 Creation of Lifecycle Phases in a Manufacturing Process Plan.....	179
7.7.3 Implementation of Required Workflow	179
7.7.4 Results and Discussions.....	179
7.8 Conclusions	182
Acknowledgement	183
References.....	183
8 Adaptive Setup Planning for Job Shop Operations under Uncertainty	187
<i>Lihui Wang, Hsi-Yung Feng, Ningxu Cai, Ji Ma</i>	
8.1 Introduction	187
8.2 Literature Review	188
8.3 Adaptive Setup Planning	190
8.3.1 Research Background	190
8.3.2 Generic Setup Planning	191
8.3.3 Setup Merging on a Single Machine.....	192
8.3.4 Adaptive Setup Merging across Machines	198
8.4 Implementation and Case Study	206
8.4.1 Prototype Implementation.....	206
8.4.2 A Case Study	206
8.4.3 Optimisation Results.....	209
8.4.4 Discussion.....	213
8.5 Conclusions	214

Acknowledgement	215
References.....	215
9 Auction-based Heuristic in Digitised Manufacturing Environment for Part Type Selection and Operation Allocation	217
<i>M. K. Tiwari, M. K. Pandey</i>	
9.1 Introduction	217
9.2 Overview of Agent Technology	221
9.2.1 Definition of an Agent and its Properties	221
9.2.2 Heterarchical Control Framework	222
9.2.3 Contract-net Protocol (CNP)	222
9.3 Overview of Auction Mechanism.....	223
9.4 Problem Definition	224
9.5 Proposed Framework.....	225
9.5.1 Agent Architecture.....	225
9.5.2 Framework with Agent Architecture	227
9.5.3 Framework of Auction Mechanism	229
9.5.4 Communications among Agents.....	231
9.5.5 Task Decomposition/Distribution Pattern.....	231
9.5.6 Heuristic Rules for Sequencing and Part Selection.....	232
9.6 Case Study.....	234
9.6.1 Winner Determination	234
9.6.2 Analysis of the Best Sequence.....	236
9.6.3 Results and Discussion	236
9.7 Conclusions	240
Acknowledgement	241
References.....	241
10 A Web-based Rapid Prototyping Manufacturing System for Rapid Product Development	245
<i>Hongbo Lan</i>	
10.1 Introduction	245
10.2 Web-based RP&M Systems: a Comprehensive Review	246
10.2.1 Various Architectures for Web-based RP&M Systems	246
10.2.2 Key Issues in Developing Web-based RP&M Systems.....	248
10.3 An Integrated Manufacturing System for Rapid Product Development Based on RP&M	251
10.4 Workflow of a Web-based RP&M System.....	253
10.5 Architecture of a Web-based RP&M System.....	254
10.6 Development of a Web-based RP&M System	258
10.7 Case Study.....	259
10.8 Conclusions	261
Acknowledgement	262
References.....	262

11 Agent-based Control for Desktop Assembly Factories	265
<i>José L. Martínez Lastra, Carlos Insaurrealde, Armando Colombo</i>	
11.1 Introduction	265
11.2 Agent-based Manufacturing Control	267
11.2.1 Collaborative Industrial Automation	268
11.2.2 Agent-based Control: the State of the Art.....	269
11.2.3 Further Work Required.....	271
11.3 Actor-based Assembly Systems Architecture.....	272
11.3.1 Architecture Overview.....	273
11.3.2 Intelligent Physical Agents: Actors	274
11.3.3 Agent Societies: ABAS Systems	276
11.3.4 Actor Contact Features	279
11.4 ABAS Engineering Framework.....	282
11.4.1 ABAS WorkBench	283
11.4.2 ABAS Viewer.....	284
11.4.3 Actor Blueprint	285
11.5 Case Studies	286
11.5.1 Experimental Development of Actor Prototypes	286
11.5.2 Experimental Results and Future Directions	287
11.6 Conclusions	289
References.....	289
12 Information Sharing in Digital Manufacturing Based on STEP and XML.....	293
<i>Xiaoli Qiu, Xun Xu</i>	
12.1 Introduction	293
12.2 STEP as a Neutral Product Data Format	294
12.2.1 Components of STEP	295
12.3 XML as the “Information Carrier”	298
12.3.1 Development and Application Domain of XML	299
12.3.2 EXPRESS-XML DTD Binding Methods	299
12.4 A Digital Manufacturing Support System	300
12.4.1 System Architecture.....	301
12.4.2 Overview of the System.....	301
12.4.3 System Functionality	302
12.4.4 Converter	306
12.4.5 Late Binding Rules	307
12.4.6 System Interface	307
12.5 Conclusions	309
References.....	311
Appendix.....	312

13 Pulling the Value Streams of a Virtual Enterprise with a Web-based Kanban System	317
<i>Hung-da Wan, Sanjay Kumar Shukla, F. Frank Chen</i>	
13.1 Introduction	317
13.2 Lean Systems and Virtual Enterprises.....	319
13.2.1 Lean Manufacturing Systems	319
13.2.2 Lean Supply Chain	320
13.2.3 Agile Virtual Enterprise.....	321
13.3 From Kanban Cards to Web-based Kanban	322
13.3.1 Kanban Systems: The Enabler of Just-in-Time	322
13.3.2 Weakness of Conventional Kanban Systems.....	323
13.3.3 Web-based Technology and e-Kanban	324
13.4 Building a Web-based Kanban System	325
13.4.1 Infrastructure and Functionality of a Web-based Kanban System	326
13.4.2 An Experimental System Using PHP+MySQL	328
13.5 Pulling the Value Streams of a Virtual Enterprise.....	331
13.5.1 Web-based Kanban for Virtual Cells.....	331
13.5.2 Cyber-enabled Agile Virtual Enterprise	333
13.5.3 Ensuring Leanness of the Agile Virtual Enterprise.....	335
13.6 Challenges and Future Research.....	336
13.6.1 Challenges of Web-based Kanban in an Agile Virtual Enterprise.....	336
13.6.2 Conclusions and Future Research.....	337
Acknowledgement	337
References.....	338
14 Agent-based Workflow Management for RFID-enabled Real-time Reconfigurable Manufacturing	341
<i>George Q. Huang, YingFeng Zhang, Q. Y. Dai, Oscar Ho, Frank J. Xu</i>	
14.1 Introduction	342
14.2 Overview of Real-time Reconfigurable Manufacturing	345
14.3 Overview of Shop-floor Gateway.....	347
14.3.1 Workflow Management	347
14.3.2 Manufacturing Services UDDI	348
14.3.3 Agents-based Manufacturing Services	349
14.4 Overview of Work-cell Gateway.....	350
14.5 Agent-based Workflow Management for RTM.....	351
14.5.1 Workflow Model	351
14.5.2 Workflow Definition	353
14.5.3 Workflow Execution.....	354
14.6 Case Study.....	355
14.6.1 Re-engineering Manufacturing Job Shops.....	355
14.6.2 Definition of Agents and Workflow	357
14.6.3 Facilities for Operators and Supervisors.....	359

14.6.4	WIP Logistics Process	360
14.7	Conclusions	362
	Acknowledgements	362
