

Contents

Part I Introduction	1
Mathematical Background	3
0.1 Sets	3
0.2 Relations	7
0.3 Graphs	11
0.4 Proofs	15
Exercises	18
Chapter 1 Languages	25
1.1 Formalization of languages	25
1.2 Expressions and grammars	33
1.2.1 Expressions	33
1.2.2 Grammars	34
1.2.3 Specification of a programming language	39
1.3 Translations	48
Exercises	52
Programming Projects	57
Chapter 2 Automata	59
2.1 Conceptualization of automata	59
2.2 Transducers	71
2.3 Computability	78
Exercises	82
Programming Projects	88
Bibliographic notes	90
Part II Regular Languages	91
Chapter 3 Models for Regular Languages	93
3.1 Regular expressions	93
3.2 Finite automata	99
3.2.1 Basic definitions	99

3.2.2	Elimination of ε -moves	122
3.2.3	Determinism	145
3.2.4	Simplification	156
3.2.5	Minimization	171
3.3	Finite Automata and regular expressions	175
3.3.1	From regular expressions to finite automata	175
3.3.1.1	Conversion of regular expressions to finite automata	175
3.3.1.2	Scanning	196
3.3.2	From finite automata to regular expressions	209
3.3.3	Equivalence of finite automata and regular expressions	219
	Exercises	220
	Programming projects	227

Chapter 4 Properties of Regular Languages **229**

4.1	Pumping lemma	229
4.2	Closure properties	237
4.3	Decidable problems	250
	Exercises	259
	Bibliographic notes	265

Part III Context-Free Languages **267**

Chapter 5 Models for Context-Free Languages **269**

5.1	Context-free grammars	269
5.1.1	Basic definitions	269
5.1.2	Ambiguity	299
5.1.3	Simplification	305
5.1.3.1	Elimination of useless symbols	305
5.1.3.2	Elimination of ε -productions	321
5.1.3.3	Elimination of unit productions	334
5.1.3.4	Proper context-free grammars	346
5.1.4	Normal forms	347
5.1.4.1	Chomsky normal form	348
5.1.4.2	Greibach normal form	357
5.2	Pushdown automata	381
5.2.1	Basic definitions	381
5.2.2	Extension	415
5.2.3	Determinism	432
5.3	Pushdown automata and context-free grammars	441

5.3.1	From context-free grammars to pushdown automata	442
5.3.1.1	Conversion of context-free grammars to pushdown automata	442
5.3.1.2	Parsing	477
5.3.2	From pushdown automata to context-free grammars	486
5.3.3	Equivalence of pushdown automata and context-free grammars	494
	Exercises	495
	Programming projects	508

Chapter 6 Properties of Context-Free Languages **511**

6.1	Pumping lemma	511
6.2	Closure properties	528
6.3	Decidable problems	551
	Exercises	558

Chapter 7 Special Types of Context-Free Languages and Their Models **565**

7.1	Deterministic context-free languages	565
7.2	Linear and regular grammars	574
	Exercises	599
	Bibliographic notes	605

Part IV Beyond Context-Free Languages **607**

Chapter 8 Generalized Models **609**

8.1	Turing machines	609
8.1.1	Basic definitions	609
8.1.2	Determinism	631
8.1.3	Simplification	643
8.1.4	Extension	652
8.1.5	Universality	674
8.1.6	Turing machines that always halt	693
8.1.7	Linear-bounded automata	695
8.2	Two-pushdown automata	696
8.2.1	Basic definitions	696
8.2.2	Determinism	704
8.2.3	Equivalence of two-pushdown automata and Turing	

machine	705
8.3 Unrestricted grammars	707
8.3.1 Basic definition	708
8.3.2 Equivalence of unrestricted grammars and Turing machines	713
8.3.3 Normal forms	722
8.3.4 Context-sensitive grammars	729
8.3.4.1 Basic definition	730
8.3.4.2 Context-sensitive grammars and linear-bounded automata	732
8.3.4.3 Context-sensitive languages and recursive languages	735
8.3.4.4 Normal forms of context-sensitive grammars	740
8.4 Hierarchy of language families	742
Exercises	743
Programming projects	753
Bibliographic notes	755

Part V Translations **757**

Chapter 9 Finite and Pushdown Transducers **758**

9.1 Finite transducers	758
9.2 Translation grammars and pushdown transducers	770
9.2.1 Translation grammars	770
9.2.2 Pushdown transducers	776
9.3 Compilers	787
9.3.1 Compiler structure	788
9.3.2 Scanner	789
9.3.3 Parser, semantic analyzer, and code generator	806
9.3.4 Optimizer	818
9.3.5 Execution	820
Exercises	822
Programming projects	832

Chapter 10 Turing Transducers **833**

10.1 Basic definitions	833
10.2 Computability	845
10.2.1 Computers	845
10.2.2 Computable functions	851
10.2.3 Uncomputable functions	853

10.3 Decidability	856
10.3.1 Decision makers	856
10.3.2 Decidable problems	860
10.3.3 Computational complexity	861
10.3.3.1 Time complexity	862
10.3.3.2 Space complexity	866
10.3.4 Undecidable problems	867
10.3.5 Undecidability: a general approach	872
Exercises	874
Programming projects	884
Bibliographic notes	886

Bibliography **889**

Indices **901**

Index to Special Symbols **903**

Index to Decision Problems **905**

Index to Algorithms **907**

Subject Index **911**
