Dedication	V
Preface	VII
Table of Contents	XIII
List of Tables	XVII
List of Figures	XIX
Nomenclature	XXI
1 INTRODUCTION	1
1.1 Fault Tolerant Control System (FTCS)	1
1.1.1 Definition of FTCS	1
1.1.2 Classification of FTCS	2
1.2 Background and Motivations	4
1.3 Advances in Fault Tolerant Control Systems	6
1.4 Scope of the Book	9
2 ACTIVE FAULT TOLERANT CONTROL IN PROSPECTIVE	11
2.1 Introduction	11
2.2 Faults in Dynamic Systems	11
2.3 Fault Detection and Identification (FDI)	13
2.3.1 Approaches to FDI	13
2.3.2 Diagnostic procedure of FDI	16
2.3.3 Performance measures in FDI	17
2.4 Control System Reconfiguration	18
2.5 Applications of FTCS	20
3 STOCHASTIC STABILITY	22
3.1 Introduction	22
3.2 Definitions of Stochastic Stability	23
3.3 Conditions for Stochastic Stability	26

4	FTCS WITH MARKOVIAN PARAMETERS (FTCSMP)	30
4.1	Mathematical Models	31
4.1.1	Dynamical system models	31
4.1.2	Failure and FDI processes	33
4.2	Calculation of Transition Rates	35
4.3	The Uniqueness of FTCSMP Model	37
4.3.1	Errors in detection and identification	37
4.3.2	Detection delays and false alarms	37
4.4	Stochastic Stability of FTCSMP	38
4.4.1	Supermartingales	39
4.4.2	Stochastic Lyapunov functions	39
4.4.3	The weak infinitesimal operator	40
4.4.4	Dynkin's formula	41
4.4.5	Conditions for stochastic stability	43
5	STOCHASTIC STABILITY OF FTCSMP	45
5.1	Introduction	45
5.2	Stochastic Stability of FTCSMP in the Presence of Noise	46
5.2.1	Dynamical model of FTCSMP in the presence of noise	47
5.2.2	Sufficient conditions for stochastic stability	49
5.2.3	Necessary conditions for stochastic stability	53
5.2.4	A necessary and sufficient condition for exponential stability	56
5.2.5	A numerical example	61
5.3	Stability of FTCSMP with Multiple Failure Processes	67
5.3.1	Dynamical model of FTCSMP with multiple failures	68
5.3.2	Transition probabilities for failure and FDI processes	70
5.3.3	Stochastic stability	70
5.3.4	A necessary and sufficient condition for exponential stability	72
5.3.5	Remarks and special cases	76
5.3.6	A numerical example	79
5.4	Chapter Summary	82
6	PERFORMANCE AND STABILITY OF FTCSMP UNDER IM- PERFECT FDI	83
6.1	Introduction	83
6.2	Effects of Detection Delays on the Stability of FTCSMP	84
6.2.1	Dynamical model of FTCSMP with detection delays	85

6.2.2	Interpretation of detection delays in FDI process	85
6.2.3	Exponentially distributed detection delays	86
6.2.4	γ distributed detection delays	86
6.2.5	A necessary and sufficient condition for stochastic stability	88
6.2.6	A numerical example	89
6.3	Effects of Detection Errors on the Stability of FTCSMP	92
6.3.1	A new FTCSMP model	93
6.3.2	The role of FDI in fault tolerant control law design	94
6.3.3	A necessary and sufficient condition for stochastic stability	97
6.3.4	A numerical example	97
6.4	Chapter Summary	101

7 FTCSMP WITH ACTUATOR SATURATION AND PARAMETER UNCERTAINTIES 103

7.1	Introduction	103
7.2	Stability of FTCSMP Driven by Actuators with Saturation	104
7.2.1	Dynamical model of FTCSMP with actuator saturation limit	105
7.2.2	Actuators with saturation limits	105
7.2.3	Exponential stability of FTCSMP	106
7.2.4	A sufficient condition for exponential stability of FTCSMP	109
7.2.5	Remarks and special cases	113
7.2.6	A numerical example	119
7.3	Stabilization of FTCSMP with Parameter Uncertainties	124
7.3.1	Dynamical model of FTCSMP with parameter uncertainties	126
7.3.2	The model of parameter uncertainties	128
7.3.3	Stabilization of uncertain FTCSMP	129
7.3.4	Special cases	138
7.3.5	A numerical example	141
7.4	Chapter Summary	146

8 SYNTHESIS OF FAULT TOLERANT CONTROL LAWS 148

8.1	Introduction	148
8.2	Design Approaches to Fault Tolerant Control Laws	150
8.2.1	The problem statement	150
8.2.2	A control law on finite time horizon	153
8.2.3	Control laws on infinite time horizons	158
8.2.4	A numerical example	163

8.3	A Fault Tolerant Control Law in Noisy Environment	169
8.3.1	The problem statement	169
8.3.2	A control law on finite time horizon	170
8.3.3	A control law on infinite time horizon	173
8.3.4	A numerical example	180
8.4	Chapter Summary	181
9	EPILOGUE	184
9.1	Summary	184
	BIBLIOGRAPHY	188
	INDEX	207
