

Contents

1. Self-Adjointness	1
1.1 Basic Perturbation Theorems	1
1.2 The Classes S_ν and K_ν	3
1.3 Kato's Inequality and All That	8
1.4 The Leinfelder-Simader Theorem	11
2. L^p-Properties of Eigenfunctions, and All That	13
2.1 Semigroup Properties	13
2.2 Estimates on Eigenfunctions	17
2.3 Local Estimates on Gradients	19
2.4 Eigenfunctions and Spectrum (Sch'nol's Theorem)	20
2.5 The Allegretto-Piepenbrink Theorem	22
2.6 Integral Kernels for $\exp(-tH)$	24
3. Geometric Methods for Bound States	27
3.1 Partitions of Unity and the IMS Localization Formula	27
3.2 Multiparticle Schrödinger Operators	29
3.3 The HVZ-Theorem	32
3.4 More on the Essential Spectrum	36
3.5 A Theorem of Klaus: Widely Separated Bumps	39
3.6 Applications to Atomic Physics: A Warm-up	41
3.7 The Ruskai-Sigal Theorem	43
3.8 Lieb's Improvement of the Ruskai-Sigal Theorem	50
3.9 N -Body Systems with Finitely Many Bound States	52
Appendix: The Stone-Weierstrass Gavotte	58
4. Local Commutator Estimates	60
4.1 Putnam's Theorem and the Mourre Estimate	60
4.2 Control of Imbedded Eigenvalues	65
4.3 Absence of Singular Continuous Spectrum	67
4.4 Exponential Bounds and Nonexistence of Positive Eigenvalues	74
4.5 The Mourre Estimate for N -Body Schrödinger Operators	82
5. Phase Space Analysis of Scattering	89
5.1 Some Notions of Scattering Theory	89
5.2 Perry's Estimate	92

5.3	Enss' Version of Cook's Method	95
5.4	RAGE Theorems	97
5.5	Asymptotics of Observables	101
5.6	Asymptotic Completeness	105
5.7	Asymptotic Completeness in the Three-Body Case	106
	Notes Added for this Reprint	114
6.	Magnetic Fields	115
6.1	Gauge Invariance and the Essential Spectrum	117
6.2	A Schrödinger Operator with Dense Point Spectrum	120
6.3	Supersymmetry (in 0-Space Dimensions)	121
6.4	The Aharonov-Casher Result on Zero Energy Eigenstates	126
6.5	Theorem of Iwatsuka	130
6.6	An Introduction to Other Phenomena in Magnetic Fields	131
	Notes Added for this Reprint	134
7.	Electric Fields	135
7.1	The Two-Body Stark Effect	135
7.2	A Theorem Needed for the Mourre Theory of the One-Dimensional Electric Field	137
7.3	Propagators for Time-Dependent Electric Fields	140
7.4	Howland's Formalism and Floquet Operators	146
7.5	Potentials and Time-Dependent Problems	149
	Notes Added for this Reprint	152
8.	Complex Scaling	153
8.1	Review of "Ordinary" Complex Scaling	153
8.2	Translation Analyticity	158
8.3	Higher Order Mourre Theory	159
8.4	Computational Aspects of Complex Scaling	160
8.5	Complex Scaling and the DC-Stark Effect	161
8.6	Complex Scaling and the AC-Stark Effect	163
8.7	Extensions and Generalizations	165
	Notes Added for this Reprint	167
9.	Random Jacobi Matrices	168
9.1	Basic Definitions and Results	169
9.2	The Density of States	175
9.3	The Lyapunov Exponent and the Ishii-Pastur-Kotani Theorem	180
9.4	Subharmonicity of the Lyapunov Exponent and the Thouless Formula	186
9.5	Point Spectrum for the Anderson Model	190
	Notes Added for this Reprint	201

10. Almost Periodic Jacobi Matrices	203
10.1 Almost Periodic Sequences and Some General Results	203
10.2 The Almost Mathieu Equation and the Occurrence of Singular Continuous Spectrum	205
10.3 Pure Point Spectrum and the Maryland Model	209
10.4 Cantor Sets and Recurrent Absolutely Continuous Spectrum . . .	218
Notes Added for this Reprint	223
11. Witten's Proof of the Morse Inequalities	224
11.1 The Quasiclassical Eigenvalue Limit	224
11.2 The Morse Inequalities	230
11.3 Hodge Theory	233
11.4 Witten's Deformed Laplacian	238
11.5 Proof of Theorem 11.4.	241
12. Patodi's Proof of the Gauss-Bonnet-Chern Theorem and Superproofs of Index Theorems	245
12.1 A Very Rapid Course in Riemannian Geometry	245
12.2 The Berezin-Patodi Formula	254
12.3 The Gauss-Bonnet-Chern Theorem: Statement and Strategy of the Proof	259
12.4 Bochner Laplacian and the Weitzenböck Formula	265
12.5 Elliptic Regularity	272
12.6 A Canonical Order Calculus	280
12.7 Cutting and Pasting	290
12.8 Completion of the Proof of the Gauss-Bonnet-Chern Theorem . .	291
12.9 Mehler's Formula	291
12.10 Introduction to the Index Theorem for Dirac Operators	304
Bibliography	307
References Added for this Reprint	321
List of Symbols	325
Subject Index	327
