
Contents

1	Introduction	1
2	Experimental Evidence and Elementary Theory	11
	Strength	11
	Pore pressure	11
	Tensile fracture	13
	Extension or “cleavage” fracture	18
	Geological implications	21
	Summary	25
3	Hydraulic Fractures	27
	Internal hydraulic fracturing	27
	Aperture of tensile hydraulic fractures	32
	Hydraulic intrusion fracturing	34
	Movement of closed fractures	38
	The dyke-sill mechanism	40
	Permeable wall rocks	43
	Summary	46
	Appendix	48
4	Termination and Spacing of Tension Joints in Layered Rocks	49
	Termination of tension joints	49
	Spacing of tension joints	55
	Price’s frictional coupling model	56
	The Hobbs model	58
	Thin weak interlayers	66
	Infill jointing	68
	Improvements and “fracture saturation”	68
	Models and reality	74
	Delamination	76
	Inclined layers	83
	Irregular spacing and closely spaced joints	85
	Cleavage (extension) joints	87
	Spacing of cleavage joints	91
	Summary of joint spacing	94
	Appendix	98
5	Multiple Sets of Tension Joints	101
	Systematic and non-systematic joints	101
	Non-orthogonal sets	103
	Further causes of orthogonal jointing	105
	Jointing in basins	105
	“Locked-in” or “residual” stresses	113
	Orthogonal joint sets in compressional folding	117
	The straightness of systematic joints	119
	Summary of multiple joint sets	122

6	Shear Joints	125
	“Shear joints” vs. tension joints and faults	125
	Origins of shear joints	129
	Pre-peak shear bands	134
	Mechanism of pre-peak banding	141
	Spacing of shear joints	148
	Summary and comments	149
	Appendix	152
7	Joints in Faulting and Folding	153
	Joints and faults	153
	Pre-faulting fractures	153
	Fracturing in the tip region of a growing fault	156
	Rock deformation along faults	164
	Healed joints opening concurrently with fault slip	168
	Strike-slip faults parallel to joints	172
	Perturbation of joints by pre-existing faults	175
	Joints in compressive folds	180
	Summary of joints in faulting	182
8	Échelon Joints and Veins	185
	En échelon cracks in shear zones	185
	Échelon fractures in pre-peak shear bands	192
	Self-organization of en échelon fractures	196
	The breakdown of parent cracks into dilatant échelon cracks	198
	Summary of dilatant en échelon fractures	201
	Appendix: The Stress Circle	205
	Derivation	205
	Mohr’s stress circle	207
	Stress relations	208
	Three-dimensional state of stress	208
	The “pole” of the stress circle	210
	Examples	211
	References	215
	Index	219
