
Contents

1	$\mathrm{GL}_n(\mathbf{R})$ Action on $\mathrm{Pos}_n(\mathbf{R})$	1
1	Iwasawa-Jacobi Decomposition	2
2	Inductive Construction of the Grenier Fundamental Domain	6
3	The Inductive Coordinates on SPos_n	14
4	The Grenier Fundamental Domain and the Minimal Compactification of $\Gamma_n \backslash \mathrm{SPos}_n$	17
5	Siegel Sets	20
2	Measures, Integration and Quadratic Model	23
1	Siegel Sets and Finiteness of Measure Mod $\mathrm{SL}_n(\mathbf{Z})$	24
2	Decompositions of Haar Measure on $\mathrm{Pos}_n(\mathbf{R})$	25
3	Decompositions of Haar Measure on SPos_n	36
4	Siegel's Formula	39
3	Special Functions on Pos_n	49
1	Characters of Pos_n	50
2	The Gamma Function	55
3	The Bengtson Bessel Function	58
4	Mellin and Fourier Transforms	69
4	Invariant Differential Operators on $\mathrm{Pos}_n(\mathbf{R})$	75
1	Invariant Polynomials	75
2	Invariant Differential Operators on Pos_n the Maass-Selberg Generators	78
3	The Lie Algebra Generators	84
4	The Transpose of an Invariant Differential Operator	87
5	Invariant Differential Operators on A and the Normal Projection	90

VIII Contents

5	Poisson Duality and Zeta Functions	95
1	Poisson Duality	95
2	The Matrix Scalar Product	97
3	The Epstein Zeta Function: Riemann's Expression	99
4	Epstein Zeta Function: A Change of Variables	104
5	Epstein Zeta Function: Bessel-Fourier Series	105
6	Eisenstein Series First Part	107
1	Adjointness Relations	107
2	Fourier Expansion Determined by Partial Iwasawa Coordinates	110
3	Fourier Coefficients from Partial Iwasawa Coordinates	114
4	A Fourier Expansion on $S\text{Pos}_n(\mathbf{R})$	116
5	The Regularizing Operator $Q_Y = Y \frac{\partial}{\partial Y}$	118
7	Geometric and Analytic Estimates	121
1	The Metric and Iwasawa Coordinates	121
2	Convergence Estimates for Eisenstein Series	125
3	A Variation and Extension	130
8	Eisenstein Series Second Part	133
1	Integral Matrices and Their Chains	134
2	The $\zeta_{\mathbf{Q}}$ Fudge Factor	140
3	Eisenstein Series	143
4	Adjointness and the $\Gamma_U \backslash \Gamma$ -trace	148
5	Changing to the (s_1, \dots, s_n) -variables	152
6	Functional Equation: Invariance under Cyclic Permutations	157
7	Invariance under All Permutations	159
	Bibliography	163
	Index	167
