## Contents

<b>Summary of Quantum Mechanics</b> .....	1
1 Principles .....	1
2 General Results .....	4
3 The Particular Case of a Point-Like Particle; Wave Mechanics.	4
4 Angular Momentum and Spin .....	6
5 Exactly Soluble Problems .....	7
6 Approximation Methods .....	9
7 Identical Particles .....	10
8 Time-Evolution of Systems .....	11
9 Collision Processes .....	12

---

### Part I Elementary Particles, Nuclei and Atoms

---

<b>1 Neutrino Oscillations</b> .....	17
1.1 Mechanism of the Oscillations; Reactor Neutrinos .....	18
1.2 Oscillations of Three Species; Atmospheric Neutrinos .....	20
1.3 Solutions .....	23
1.4 Comments .....	27
<b>2 Atomic Clocks</b> .....	29
2.1 The Hyperfine Splitting of the Ground State .....	29
2.2 The Atomic Fountain .....	31
2.3 The GPS System .....	32
2.4 The Drift of Fundamental Constants .....	32
2.5 Solutions .....	33
<b>3 Neutron Interferometry</b> .....	37
3.1 Neutron Interferences .....	38
3.2 The Gravitational Effect .....	39
3.3 Rotating a Spin 1/2 by 360 Degrees .....	40

X Contents

3.4	Solutions	42
<b>4</b>	<b>Spectroscopic Measurement on a Neutron Beam</b>	<b>47</b>
4.1	Ramsey Fringes	47
4.2	Solutions	49
<b>5</b>	<b>Analysis of a Stern–Gerlach Experiment</b>	<b>55</b>
5.1	Preparation of the Neutron Beam	55
5.2	Spin State of the Neutrons	57
5.3	The Stern–Gerlach Experiment	57
5.4	Solutions	59
<b>6</b>	<b>Measuring the Electron Magnetic Moment Anomaly</b>	<b>65</b>
6.1	Spin and Momentum Precession of an Electron in a Magnetic Field	65
6.2	Solutions	66
<b>7</b>	<b>Decay of a Tritium Atom</b>	<b>69</b>
7.1	The Energy Balance in Tritium Decay	69
7.2	Solutions	70
7.3	Comments	71
<b>8</b>	<b>The Spectrum of Positronium</b>	<b>73</b>
8.1	Positronium Orbital States	73
8.2	Hyperfine Splitting	73
8.3	Zeeman Effect in the Ground State	74
8.4	Decay of Positronium	75
8.5	Solutions	77
<b>9</b>	<b>The Hydrogen Atom in Crossed Fields</b>	<b>81</b>
9.1	The Hydrogen Atom in Crossed Electric and Magnetic Fields	82
9.2	Pauli’s Result	82
9.3	Solutions	83
<b>10</b>	<b>Energy Loss of Ions in Matter</b>	<b>87</b>
10.1	Energy Absorbed by One Atom	87
10.2	Energy Loss in Matter	88
10.3	Solutions	90
10.4	Comments	94

**Part II Quantum Entanglement and Measurement**

---

<b>11</b>	<b>The EPR Problem and Bell's Inequality</b> .....	99
11.1	The Electron Spin .....	99
11.2	Correlations Between the Two Spins .....	100
11.3	Correlations in the Singlet State .....	100
11.4	A Simple Hidden Variable Model .....	101
11.5	Bell's Theorem and Experimental Results .....	102
11.6	Solutions .....	103
<b>12</b>	<b>Schrödinger's Cat</b> .....	109
12.1	The Quasi-Classical States of a Harmonic Oscillator .....	109
12.2	Construction of a Schrödinger-Cat State .....	111
12.3	Quantum Superposition Versus Statistical Mixture .....	111
12.4	The Fragility of a Quantum Superposition .....	112
12.5	Solutions .....	114
12.6	Comments .....	119
<b>13</b>	<b>Quantum Cryptography</b> .....	121
13.1	Preliminaries .....	121
13.2	Correlated Pairs of Spins .....	122
13.3	The Quantum Cryptography Procedure .....	125
13.4	Solutions .....	126
<b>14</b>	<b>Direct Observation of Field Quantization</b> .....	131
14.1	Quantization of a Mode of the Electromagnetic Field .....	131
14.2	The Coupling of the Field with an Atom .....	133
14.3	Interaction of the Atom with an "Empty" Cavity .....	134
14.4	Interaction of an Atom with a Quasi-Classical State .....	135
14.5	Large Numbers of Photons: Damping and Revivals .....	136
14.6	Solutions .....	137
14.7	Comments .....	144
<b>15</b>	<b>Ideal Quantum Measurement</b> .....	147
15.1	Preliminaries: a von Neumann Detector .....	147
15.2	Phase States of the Harmonic Oscillator .....	148
15.3	The Interaction between the System and the Detector .....	149
15.4	An "Ideal" Measurement .....	149
15.5	Solutions .....	150

XII Contents

15.6	Comments	153
<b>16</b>	<b>The Quantum Eraser</b>	155
16.1	Magnetic Resonance	155
16.2	Ramsey Fringes	156
16.3	Detection of the Neutron Spin State	158
16.4	A Quantum Eraser	159
16.5	Solutions	160
16.6	Comments	166
<b>17</b>	<b>A Quantum Thermometer</b>	169
17.1	The Penning Trap in Classical Mechanics	169
17.2	The Penning Trap in Quantum Mechanics	170
17.3	Coupling of the Cyclotron and Axial Motions	172
17.4	A Quantum Thermometer	173
17.5	Solutions	174

---

**Part III Complex Systems**

---

<b>18</b>	<b>Exact Results for the Three-Body Problem</b>	185
18.1	The Two-Body Problem	185
18.2	The Variational Method	186
18.3	Relating the Three-Body and Two-Body Sectors	186
18.4	The Three-Body Harmonic Oscillator	187
18.5	From Mesons to Baryons in the Quark Model	187
18.6	Solutions	188
<b>19</b>	<b>Properties of a Bose–Einstein Condensate</b>	193
19.1	Particle in a Harmonic Trap	193
19.2	Interactions Between Two Confined Particles	194
19.3	Energy of a Bose–Einstein Condensate	195
19.4	Condensates with Repulsive Interactions	195
19.5	Condensates with Attractive Interactions	196
19.6	Solutions	197
19.7	Comments	202
<b>20</b>	<b>Magnetic Excitons</b>	203
20.1	The Molecule $\text{CsFeBr}_3$	203
20.2	Spin–Spin Interactions in a Chain of Molecules	204
20.3	Energy Levels of the Chain	204
20.4	Vibrations of the Chain: Excitons	206
20.5	Solutions	208

<b>21</b>	<b>A Quantum Box</b> .....	215
21.1	Results on the One-Dimensional Harmonic Oscillator .....	216
21.2	The Quantum Box .....	217
21.3	Quantum Box in a Magnetic Field .....	218
21.4	Experimental Verification .....	219
21.5	Anisotropy of a Quantum Box .....	220
21.6	Solutions .....	221
21.7	Comments .....	229
<b>22</b>	<b>Colored Molecular Ions</b> .....	231
22.1	Hydrocarbon Ions .....	231
22.2	Nitrogenous Ions .....	232
22.3	Solutions .....	233
22.4	Comments .....	235
<b>23</b>	<b>Hyperfine Structure in Electron Spin Resonance</b> .....	237
23.1	Hyperfine Interaction with One Nucleus .....	238
23.2	Hyperfine Structure with Several Nuclei .....	238
23.3	Experimental Results .....	239
23.4	Solutions .....	240
<b>24</b>	<b>Probing Matter with Positive Muons</b> .....	245
24.1	Muonium in Vacuum .....	246
24.2	Muonium in Silicon .....	247
24.3	Solutions .....	249
<b>25</b>	<b>Quantum Reflection of Atoms from a Surface</b> .....	255
25.1	The Hydrogen Atom–Liquid Helium Interaction .....	255
25.2	Excitations on the Surface of Liquid Helium .....	257
25.3	Quantum Interaction Between H and Liquid He .....	258
25.4	The Sticking Probability .....	258
25.5	Solutions .....	259
25.6	Comments .....	265
<b>26</b>	<b>Laser Cooling and Trapping</b> .....	267
26.1	Optical Bloch Equations for an Atom at Rest .....	267
26.2	The Radiation Pressure Force .....	268
26.3	Doppler Cooling .....	269
26.4	The Dipole Force .....	270
26.5	Solutions .....	270
26.6	Comments .....	276

<b>27 Bloch Oscillations</b> .....	277
27.1 Unitary Transformation on a Quantum System .....	277
27.2 Band Structure in a Periodic Potential .....	277
27.3 The Phenomenon of Bloch Oscillations .....	278
27.4 Solutions .....	281
27.5 Comments .....	285
<b>Author Index</b> .....	287
<b>Subject Index</b> .....	289
