<b>1 Solid-State Fermentation Bioreactor Fundamentals: Introduction and Overview</b> .....	<b>1</b>
<i>David A. Mitchell, Marin Berovi , and Nadia Krieger</i>	
1.1 What Is “Solid-state Fermentation”?	1
1.2 Why Should We Be Interested in SSF?	3
1.3 What Are the Current and Potential Applications of SSF?	5
1.4 Why Do We Need a Book on the Fundamentals of SSF Bioreactors?	6
1.5 How Is this Book Organized?	8
1.5.1 Introduction to Solid-State Fermentation and Bioreactors	9
1.5.2 Introduction to the Various Classes of SSF Bioreactors	9
1.5.3 Fundamentals of Modeling of SSF Bioreactors	10
1.5.4 Modeling Case Studies of SSF Bioreactors	11
1.5.5 Key Issues Associated with SSF Bioreactors	11
1.5.6 A Final Word	12
Further Reading	12
<b>2 The Bioreactor Step of SSF: A Complex Interaction of Phenomena</b> .....	<b>13</b>
<i>David A. Mitchell, Marin Berovi , Montira Nopharatana, and Nadia Krieger</i>	
2.1 The Need for a Qualitative Understanding of SSF	13
2.2 The General Steps of an SSF Process	14
2.3 The Bioreactor Step of an SSF Process	16
2.4 The Physical Structure of SSF Bioreactor Systems	17
2.4.1 A Macroscale View of the Phases in an SSF Bioreactor	17
2.4.2 A Microscale Snapshot of the Substrate Bed	20
2.5 A Dynamic View of the Processes Occurring	22
2.5.1 A Dynamic View with a Time Scale of Seconds to Minutes	22
2.5.2 A Dynamic View with a Time Scale of Hours to Days	24
2.6 Where Has this Description Led Us?	31
Further Reading	32
<b>3 Introduction to Solid-State Fermentation Bioreactors</b> .....	<b>33</b>
<i>David A. Mitchell, Marin Berovi , and Nadia Krieger</i>	
3.1 Introduction	33
3.2 Bioreactor Selection and Design: General Questions	34
3.2.1 The Crucial Questions	35
3.2.2 Other Questions to Consider	36

---

3.3 Overview of Bioreactor Types.....	38
3.3.1 Basic Design Features of the Various Bioreactor Types .....	38
3.3.2 Overview of Operating Variables.....	40
3.4 A Guide for Bioreactor Selection .....	41
Further Reading .....	43
<b>4 Heat and Mass Transfer in Solid-State Fermentation Bioreactors: Basic Principles .....</b>	<b>45</b>
<i>David A. Mitchell, Marin Berovi , Oscar F. von Meien, and Luiz F.L. Luz Jr</i>	
4.1 Introduction .....	45
4.2 An Overall Balance Over the Bioreactor .....	45
4.3 Looking Within the Bioreactor in More Detail.....	47
4.3.1 Phenomena Within Subsystems Within the Bioreactor.....	47
4.3.2 Transfer Between Subsystems When the Substrate Bed Is Treated as a Single Pseudo-Homogeneous Phase .....	50
4.3.3 Transfer Between Subsystems When the Substrate Bed Is Treated as Two Separate Phases .....	51
4.3.4 Bulk Gas Flow Patterns and Pressure Drops.....	53
4.3.5 Mixing Patterns in Agitated Beds of Solids .....	56
Further Reading .....	56
<b>5 The Scale-up Challenge for SSF Bioreactors .....</b>	<b>57</b>
<i>David A. Mitchell, Oscar F. von Meien, Luiz F.L. Luz Jr, and Marin Berovi</i>	
5.1 Introduction .....	57
5.2 The Challenges Faced at Large Scale in SLF and SSF .....	57
5.3 The Reason Why Scale-up Is not Simple .....	58
5.4 Approaches to Scale-up of SSF Bioreactors .....	63
Further Reading .....	64
<b>6 Group I Bioreactors: Un aerated and Unmixed .....</b>	<b>65</b>
<i>David A. Mitchell, Nadia Krieger, and Marin Berovi</i>	
6.1 Basic Features, Design, and Operating Variables for Tray-type Bioreactors .....	65
6.2 Use of Bag Systems in Modern Processes .....	66
6.3 Heat and Mass Transfer in Tray Bioreactors .....	67
6.3.1 Oxygen Profiles Within Trays.....	67
6.3.2 Temperature Profiles Within Trays .....	69
6.3.3 Insights from Dynamic Modeling of Trays .....	71
6.4 Conclusions .....	75
Further Reading .....	76

---

<b>7 Group II Bioreactors: Forcefully-Aerated Bioreactors Without Mixing ....</b>	<b>77</b>
<i>David A. Mitchell, Penjit Srinophakun, Nadia Krieger,</i> <i>and Oscar F. von Meien</i>	
7.1 Introduction.....	77
7.2 Basic Features, Design, and Operating Variables for Packed-Bed Bioreactors.....	77
7.3 Experimental Insights into Packed-Bed Operation.....	81
7.3.1 Large-Scale Packed-Beds.....	82
7.3.2 Pilot-Scale Packed-Beds.....	83
7.3.3 Laboratory-scale Packed-beds.....	84
7.4 Conclusions on Packed-Bed Bioreactors.....	93
Further Reading.....	94
<b>8 Group III: Rotating-Drum and Stirred-Drum Bioreactors.....</b>	<b>95</b>
<i>David A. Mitchell, Deidre M. Stuart, Matthew T. Hardin,</i> <i>and Nadia Krieger</i>	
8.1 Introduction.....	95
8.2 Basic Features, Design, and Operating Variables for Group III Bioreactors.....	95
8.3 Experimental Insights into the Operation of Group III Bioreactors.....	98
8.3.1 Large-Scale Applications.....	98
8.3.2 Pilot-Scale Applications.....	100
8.3.3 Small-Scale Applications.....	101
8.4 Insights into Mixing and Transport Phenomena in Group III Bioreactors.....	104
8.4.1 Solids Flow Regimes in Rotating Drums.....	105
8.4.2 Gas Flow Regimes in the Headspaces of Rotating Drums.....	110
8.5 Conclusions on Rotating-Drum and Stirred-Drum Bioreactors.....	112
Further Reading.....	114
<b>9 Group IVa: Continuously-Mixed, Forcefully-Aerated Bioreactors.....</b>	<b>115</b>
<i>David A. Mitchell, Nadia Krieger, Marin Berovi , and Luiz F.L. Luz Jr</i>	
9.1 Introduction.....	115
9.2 Basic Features, Design, and Operating Variables of Group IVa Bioreactors.....	115
9.3 Where Continuously-Agitated, Forcefully-Aerated Bioreactors Have Been Used.....	117
9.3.1 Stirred Beds with Mechanical Agitators.....	117
9.3.2 Gas-Solid Fluidized Beds.....	121
9.3.3 Bioreactors Mixed by the Motion of the Bioreactor Body.....	123
9.4 Insights into Mixing and Transport Phenomena in Group IVa Bioreactors.....	125
9.5 Conclusions on Group IVa Bioreactors.....	128
Further Reading.....	128

---

<b>10 Group IVb: Intermittently-Mixed Forcefully-Aerated Bioreactors .....</b>	<b>129</b>
<i>David A. Mitchell, Oscar F. von Meien, Luiz F.L. Luz Jr, Nadia Krieger, J. Ricardo Pérez-Correa, and Eduardo Agosin</i>	
10.1 Introduction .....	129
10.2 Basic Features of Group IVb Bioreactors .....	129
10.3 Experimental Insights into the Performance of Group IVb Bioreactors .....	131
10.3.1 Large-Scale Intermittently-Mixed Bioreactors .....	131
10.3.2 Pilot-Scale Intermittently-Mixed Bioreactors .....	135
10.3.3 Laboratory-Scale Intermittently-Mixed Bioreactors .....	138
10.4 Insights into Mixing and Transport Phenomena in Group IVb Bioreactors .....	138
10.5 Conclusions on Group IVb Bioreactors .....	140
Further Reading .....	140
<b>11 Continuous Solid-State Fermentation Bioreactors.....</b>	<b>141</b>
<i>Luis B. R. Sánchez, Morteza Khanahmadi, and David A. Mitchell</i>	
11.1 Introduction .....	141
11.2 Basic Features of Continuous SSF Bioreactors .....	141
11.2.1 Equipment .....	141
11.2.2 Flow Patterns: Real-Flow Models .....	146
11.3 Continuous Versus Batch Mode of Operation .....	148
11.3.1 Reduction of Upstream and Downstream Investment .....	148
11.3.2 Uniformity of the Product from Batch and Continuous Bioreactors.....	149
11.3.3 Enhanced Production Rates .....	150
11.3.4 Contamination .....	150
11.4 Comparison by Simulation of the Three CSSFBs .....	152
11.4.1 Continuous Tubular Flow Bioreactors (CTFBs) with Recycling ...	152
11.4.2 Continuous Rotating Drum Bioreactor (CRDB) .....	154
11.4.3 Continuous Stirred Tank Bioreactor (CSTB) .....	155
11.4.4 Evaluation of the Various CSSFB Configurations .....	156
11.5 Scientific and Technical Challenges for CSSFBs.....	158
Further Reading .....	158
<b>12 Approaches to Modeling SSF Bioreactors.....</b>	<b>159</b>
<i>David A. Mitchell, Luiz F.L. Luz Jr, Marin Berovi , and Nadia Krieger</i>	
12.1 What Are Models and Why Model SSF Bioreactors? .....	159
12.2 Using Models to Design and Optimize an SSF Bioreactor .....	161
12.2.1 Initial Studies in the Laboratory .....	161
12.2.2 Current Bioreactor Models as Tools in Scale-up.....	163
12.2.3 Use of the Model in Control Schemes.....	164
12.3 The Anatomy of a Model.....	164
12.4 The Seven Steps of Developing a Bioreactor Model.....	167
12.4.1 Step 1: Know What You Want to Achieve and the Effort You Are Willing to Put into Achieving It .....	170

---

12.4.2 Step 2: Draw the System at the Appropriate Level of Detail and Explicitly State Assumptions.....	170
12.4.3 Step 3: Write the Equations.....	171
12.4.4 Step 4: Estimate the Parameters and Decide on Values for the Operating Variables.....	173
12.4.5 Step 5: Solve the Model.....	174
12.4.6 Step 6: Validate the Model.....	175
12.4.7 Step 7: Use the Model.....	177
Further Reading.....	177
<b>13 Appropriate Levels of Complexity for Modeling SSF Bioreactors .....</b>	<b>179</b>
<i>David A. Mitchell, Luiz F.L. Luz Jr, Marin Berovi , and Nadia Krieger</i>	
13.1 What Level of Complexity Should We Aim for in an SSF Bioreactor Model?.....	179
13.2 What Level of Detail Should Be Used to Describe the Growth Kinetics?.....	179
13.2.1 Growth Should Be Treated as Depending on Which Factors? .....	180
13.2.2 Is It Worthwhile to Describe the Spatial Distribution of the Biomass at the Microscale? .....	182
13.2.3 Typical Features of the Kinetic Sub-models .....	183
13.3 What Level of Detail Should Be Used to Describe Transport Processes? .....	183
13.4 At the Moment Fast-Solving Models Are Useful .....	185
13.5 Having Decided on Fast-Solving Models, How to Solve Them? .....	188
13.6 Conclusions.....	188
Further Reading.....	189
<b>14 The Kinetic Sub-model of SSF Bioreactor Models: General     Considerations.....</b>	<b>191</b>
<i>David A. Mitchell and Nadia Krieger</i>	
14.1 What Is the Aim of the Kinetic Analysis? .....	191
14.2 How Will Growth Be Measured Experimentally? .....	194
14.2.1. The Problem of Measuring Biomass in SSF.....	194
14.2.2 Indirect Approaches to Monitoring Growth.....	196
14.3 What Units Should Be Used for the Biomass? .....	197
14.3.1 Grams of Biomass per Gram of Fresh Sample .....	199
14.3.2 Grams of Biomass per Gram of Dry Sample.....	199
14.3.3 Grams of Biomass per Gram of Initial Fresh or Dry Sample .....	200
14.3.4 Which Set of Units Is Best to Use for Expressing the Biomass?....	201
14.4 Kinetic Profiles and Appropriate Equations .....	201
14.5 Conclusions.....	204
Further Reading.....	205

---

<b>15 Growth Kinetics in SSF Systems: Experimental Approaches .....</b>	<b>207</b>
<i>David A. Mitchell and Nadia Krieger</i>	
15.1 Experimental Systems for Studying Kinetics .....	207
15.1.1. Flasks in an Incubator .....	208
15.1.2. Columns in a Waterbath .....	210
15.1.3. Comparison of the Two Systems.....	211
15.2 Experimental Planning.....	211
15.3 Estimation of Biomass from Measurements of Biomass Components .....	214
15.3.1 Suitable Systems for Undertaking Calibration Studies .....	214
15.3.2 Conversion of Measurements of Components of the Biomass.....	216
15.3.3 Limitations of these Calibration Methods .....	217
15.4 Conclusion .....	217
Further Reading .....	217
<b>16 Basic Features of the Kinetic Sub-model.....</b>	<b>219</b>
<i>David A. Mitchell, Graciele Viccini, Lilik Ikasari, and Nadia Krieger</i>	
16.1 The Kinetic Sub-model Is Based on a Differential Growth Equation....	219
16.2 The Basic Kinetic Expression.....	220
16.3 Incorporating the Effect of the Environment on Growth.....	222
16.3.1 Incorporating the Effect of Temperature on Growth.....	225
16.3.2 Incorporating the Effect of Water Activity on Growth .....	228
16.3.3 Combining the Effects of Several Variables .....	230
16.4 Modeling Death Kinetics .....	231
16.4.1 General Considerations in Modeling of Death Kinetics.....	231
16.4.2 Approaches to Modeling Death Kinetics that Have Been Used.....	232
16.5 Conclusion .....	234
Further Reading .....	234
<b>17 Modeling of the Effects of Growth on the Local Environment .....</b>	<b>235</b>
<i>David A. Mitchell and Nadia Krieger</i>	
17.1 Introduction .....	235
17.2 Terms for Heat, Water, Nutrients, and Gases .....	237
17.2.1 Metabolic Heat Production.....	237
17.2.2 Water Production .....	238
17.2.3 Substrate and Nutrient Consumption.....	238
17.2.4 Oxygen Consumption and Carbon Dioxide Production .....	239
17.2.5 General Considerations with Respect to Equations for the Effects of Growth on the Environment.....	243
17.3 Modeling Particle Size Changes .....	244
17.3.1 An Empirical Equation for Particle Size Reduction.....	244
17.3.2 How to Model Particle Size Changes in Bioreactor Models? .....	245
17.4 Product Formation – Empirical Approaches.....	246
17.5 Conclusions .....	247
Further Reading .....	247

---

<b>18 Modeling of Heat and Mass Transfer in SSF Bioreactors .....</b>	<b>249</b>
<i>David A. Mitchell, Oscar F. von Meien, Luiz F.L. Luz Jr, and Marin Berovi</i>	
18.1 Introduction.....	249
18.2 General Forms of Balance Equations.....	249
18.3 Conduction.....	252
18.3.1 Conduction Across the Bioreactor Wall.....	252
18.3.2 Conduction Within a Phase .....	253
18.4 Convection.....	255
18.4.1 Convection at the Bioreactor Wall .....	255
18.4.2 Convective Heat Removal from Solids to Air.....	256
18.4.3 Convective Heat Removal Due to Air Flow Through the Bed.....	258
18.5 Evaporation.....	259
18.5.1 Evaporation from the Solids to the Air Phase .....	260
18.5.2 Water Removal Due to Air Flow Through the Bed.....	261
18.6 Conclusions.....	263
Further Reading .....	263
<b>19 Substrate, Air, and Thermodynamic Parameters for SSF Bioreactor Models.....</b>	<b>265</b>
<i>David A. Mitchell, Oscar F. von Meien, Luiz F.L. Luz Jr, and Marin Berovi</i>	
19.1 Introduction.....	265
19.2 Substrate Properties .....	265
19.2.1 Particle Size and Shape .....	266
19.2.2 Particle Density .....	267
19.2.3 Bed Packing Density .....	268
19.2.4 Porosity (Void Fraction).....	270
19.2.5 Water Activity of the Solids.....	271
19.3 Air Density.....	273
19.4 Thermodynamic Properties.....	274
19.4.1 Saturation Humidity .....	275
19.4.2 Heat Capacity of the Substrate Bed.....	276
19.4.3 Enthalpy of Vaporization of Water .....	277
Further Reading .....	278
<b>20 Estimation of Transfer Coefficients for SSF Bioreactors .....</b>	<b>279</b>
<i>David A. Mitchell, Oscar F. von Meien, Luiz F.L. Luz Jr, and Marin Berovi</i>	
20.1 Introduction.....	279
20.2 Thermal Conductivities of Substrate Beds.....	279
20.3 Heat Transfer Coefficients Involving the Wall.....	280
20.3.1. Bed-to-Wall Heat Transfer Coefficients.....	281
20.3.2 Wall-to-Headspace Heat Transfer Coefficients.....	281
20.3.3 Wall-to-Surroundings Heat Transfer Coefficients.....	282
20.3.4 Overall Heat Transfer Coefficients.....	282

---

20.4 Solids-to-Air Heat and Mass Transfer Coefficients Within Beds.....	283
20.5 Bed-to-Headspace Transfer Coefficients.....	284
20.6 Conclusions.....	289
Further Reading.....	289
<b>21 Bioreactor Modeling Case Studies: Overview.....</b>	<b>291</b>
<i>David A. Mitchell</i>	
21.1 What Can the Models Be Used to Do?.....	291
21.2 Limitations of the Models.....	292
21.3 The Amount of Detail Provided about Model Development.....	293
21.4 The Order of the Case Studies.....	294
<b>22 A Model of a Well-mixed SSF Bioreactor.....</b>	<b>295</b>
<i>David A Mitchell and Nadia Krieger</i>	
22.1 Introduction.....	295
22.2 Synopsis of the Model.....	295
22.2.1 The System, Equations, and Assumptions.....	295
22.2.2 Values of Parameters and Variables.....	301
22.3 Insights the Model Gives into the Operation of Well-Mixed Bioreactors.....	303
22.3.1 Insights into Operation at Laboratory Scale.....	303
22.3.2 Insights into Operation at Large Scale.....	307
22.3.3 Effect of Scale and Operation on Contributions to Cooling of the Solids.....	310
22.4 Conclusions on the Operation of Well-Mixed Bioreactors.....	312
Further Reading.....	314
<b>23 A Model of a Rotating-Drum Bioreactor.....</b>	<b>315</b>
<i>David A. Mitchell, Deidre M. Stuart, and Nadia Krieger</i>	
23.1 Introduction.....	315
23.2 A Model of a Well-Mixed Rotating-Drum Bioreactor.....	315
23.2.1 Synopsis of the Mathematical Model and its Solution.....	315
23.2.2 Predictions about Operation at Laboratory Scale.....	320
23.2.3 Scale-up of Well-Mixed Rotating-Drum Bioreactors.....	325
23.3 What Modeling Work Says about Rotating-Drum Bioreactors Without Axial Mixing.....	328
23.4 Conclusions on the Design and Operation of Rotating-Drum Bioreactors.....	329
Further reading.....	330
<b>24 Models of Packed-Bed Bioreactors.....</b>	<b>331</b>
<i>David A. Mitchell, Penjit Srinophakun, Oscar F. von Meien,     Luiz F.L. Luz Jr, and Nadia Krieger</i>	
24.1 Introduction.....	331
24.2 A Model of a Traditional Packed-Bed Bioreactor.....	331
24.2.1 Synopsis of the Mathematical Model and its Solution.....	333

---

24.2.2 Base-Case Predictions .....	334
24.2.3 Insights that Modeling Has Given into Optimal Design and Operation of Traditional Packed-Beds .....	336
24.3 A model of the Zymotis Packed-Bed Bioreactor .....	341
24.3.1 The Model .....	341
24.3.2 Insights into Optimal Design and Operation of Zymotis Packed-Beds .....	342
24.4 Conclusions on Packed-Bed Bioreactors .....	347
Further Reading .....	347
<b>25 A Model of an Intermittently-Mixed Forcefully-Aerated Bioreactor .....</b>	<b>349</b>
<i>David A. Mitchell, Oscar F. von Meien, Luiz F.L. Luz Jr, and Nadia Krieger</i>	
25.1 Introduction .....	349
25.2 Synopsis of the Model .....	349
25.3 Insights the Model Gives into Operation of Intermittently-Mixed Bioreactors .....	353
25.3.1 Predictions about Operation at Laboratory Scale .....	353
25.3.2 Investigation of the Design and Operation of Intermittently- Mixed Forcefully-Aerated Bioreactors at Large Scale .....	357
25.4 Conclusions on Intermittently-Mixed Forcefully-Aerated Bioreactors .....	360
Further Reading .....	362
<b>26 Instrumentation for Monitoring SSF Bioreactors .....</b>	<b>363</b>
<i>Mario Fernández and J. Ricardo Pérez-Correa</i>	
26.1 Why Is It Important to Monitor SSF Bioreactors? .....	363
26.2 Which Variables Would We Like to Measure? .....	363
26.3 Available Instrumentation for On-line Measurements .....	365
26.4 Data Filtering .....	369
26.5 How to Measure the Other Variables? .....	371
Further Reading .....	374
<b>27 Fundamentals of Process Control .....</b>	<b>375</b>
<i>J. Ricardo Pérez-Correa and Mario Fernández</i>	
27.1 Main Ideas Underlying Process Control .....	375
27.1.1 Feedback .....	375
27.1.2 Control Loop .....	376
27.1.3 Computer Control Loop .....	376
27.2 Conventional Control Algorithms .....	377
27.2.1 On/Off Control .....	377
27.2.2 PID Control .....	380
27.2.3 Model Predictive Control .....	385
Further Reading .....	386

---

<b>28 Application of Automatic Control Strategies to SSF Bioreactors .....</b>	<b>387</b>
<i>J. Ricardo Pérez-Correa, Mario Fernández, Oscar F. von Meien, Luiz F.L. Luz Jr, and David A. Mitchell</i>	
28.1 Why Do We Need Automatic Control in SSF Bioreactors? .....	387
28.2 How to Control SSF Bioreactors?.....	388
28.3 Case Studies of Control in SSF Bioreactors .....	390
28.3.1 Control of the Bioreactors at PUC Chile .....	390
28.3.2 Model-Based Evaluation of Control Strategies .....	395
28.4 Future Challenges in the Control of SSF Bioreactors .....	400
Further Reading .....	401
<b>29 Design of the Air Preparation System for SSF Bioreactors.....</b>	<b>403</b>
<i>Oscar F. von Meien, Luiz F.L. Luz Jr, J. Ricardo Pérez-Correa, and David A. Mitchell</i>	
29.1 Introduction .....	403
29.2 An Overview of the Options Available .....	404
29.3 Blower/Compressor Selection and Flow Rate Control .....	407
29.4 Piping and Connections .....	408
29.5 Air Sterilization .....	408
29.6 Humidification Columns .....	409
29.7 Case Study: An Air Preparation System for a Pilot-Scale Bioreactor ...	410
Further Reading .....	412
<b>30 Future Prospects for SSF Bioreactors .....</b>	<b>413</b>
<i>David A. Mitchell, Marin Berovi , and Nadia Krieger</i>	
30.1 The Increasing Importance of SSF .....	413
30.2 Present State and Future Prospects .....	414
<b>References .....</b>	<b>417</b>
