Contents

1 The Eye and High-Dynamic-Range Vision
Bernd Hoefflinger 1
References 12

2 The High-Dynamic-Range Sensor
Bernd Hoefflinger and Verena Schneider 13
2.1 General Considerations 13
2.2 The HDRC (High-Dynamic-Range CMOS) Pixel 19
2.3 The HDRC Sensor 27
2.4 Fixed-Pattern Correction of HDR Imagers 32
2.4.1 Physical Background of Logarithmic OECF 32
2.4.2 Parameter Extraction with Software 33
2.4.3 Effects of Parameter Variation on the OECF 35
2.4.4 Presentation of Three Correction Algorithms 37
2.4.5 New Parameterized Correction Algorithm 38
2.4.6 Masking Process 40
2.4.7 Algorithm Including Temperature 41
2.4.8 Correction Procedure and Runtime 46
2.4.9 Summary 47
2.5 HDRC Dynamic Performance 47
2.6 HDRC Sensor with Global Shutter 53
References 56

3 HDR Image Noise
Bernd Hoefflinger 57
References 63

4 High-Dynamic-Range Contrast and Color Management
Bernd Hoefflinger 65
References 71

5 HDR Video Cameras
Markus Strobel and Volker Gengenbach 73
5.1 Introduction 73
5.2 HDRC CamCube Miniaturized Camera Module 75
5.2.1 Features of the HDRC CamCube 76
5.2.2 Assembly Techniques 76
5.2.3 System Design 77
5.2.4 Application Example 78
5.3 HDRC Camera Front-End 78
5.4 Digital HDRC Camera Link™ System 82
5.4.1 Features of the HDRC Camera Link Camera 84
5.4.2 Features of the "IP3 Control" Software 84
5.4.3 Application Example 84
5.5 Intelligent HDRC GEVILUX CCTV Camera 85
5.5.1 Features of the Camera 85
5.6 HDR Video-Based Aircraft Docking Guidance 90
5.6.1 Summary 90
5.6.2 Introduction 91
5.6.3 Operation 92
5.6.4 Challenges to the Sensor System 93
5.6.5 HDR Camera with Improved Sensitivity 94
5.7 Conclusion 97
References 97

6 Lenses for HDR Imaging
Hans-Joerg Schoenherr 99

7 HDRC Cameras for High-Speed Machine Vision
Bela Michael Rohrbacher, Michael Raasch and Roman Louban 107
7.1 General Requirements 107
7.2 Special Characteristics 108
7.3 Methods for Obtaining the Specific Image Information 109
7.4 Optoelectronic Transfer Function
(Lookup Table, LUT) 110
7.4.1 Mode 1:1 111
7.4.2 Mode Rec. 709 111
7.4.3 Mode Stretched 112
7.4.4 Mode CatEye 112
7.4.5 Mode CatEye2 112
7.5 Application Example Surface Inspection 113
7.6 Evaluation Algorithms 114
7.7 Robot Controlled Image-Processing System for Fully Automated
Surface Inspection 118
References 121

8 HDR Vision for Driver Assistance
Peter M. Knoll 123
8.1 Introduction 123
8.2 Components for Predictive Driver Assistance Systems 124
8.2.1 Ultrasonic Sensors 124
8.2.2 Long Range Radar 77 GHz 125
8.2.3 Video Sensor 125
8.3 Driver Assistance Systems for Convenience and for Safety 127
8.4 Video-Based Driver Assistance Systems 128
8.4.1 Video System 128
8.4.2 Image Processing 130
8.5 Night Vision Improvement System 130
8.6 Night Vision Enhancement by Image Presentation 131
8.7 Night Vision Warning 132
8.8 Sensor Data Fusion 133
8.8.1 Lane Detection and Lane Departure Warning 134
8.8.2 Traffic Sign Recognition 134
8.9 Conclusion 135
References 136

9 Miniature HDRC Cameras for Endoscopy
Christine Harendt and Klaus-Martin Irion 137
References 139

10 HDR Sub-retinal Implant for the Vision Impaired
Heinz-Gerd Graf, Alexander Dollberg, Jan-Dirk Schulze Spüntrup and Karsten Warkentin 141
10.1 Introduction 141
10.2 Electronic HDR Photoreceptors 142
10.3 The Differential Principle 143
10.4 The Complete Amplifier Cell 143
10.5 The Retinal Implant 145
References 145

11 HDR Tone Mapping
Grzegorz Krawczyk, Karol Myszkowski, and Daniel Brosch 147
11.1 Taxonomy 148
11.1.1 Spatially Invariant Operators 149
11.1.2 Spatially Variant Operators 153
11.2 HDR Video: Specific Conditions and Requirements 159
11.3 Tone Mapping for HDR Video 161
11.3.1 Response Curve Compression 161
11.3.2 Local Details Enhancement 162
11.3.3 Temporal Luminance Adaptation 163

11.3.4 Key Value . . . 164
11.3.5 Tone Mapping . . . 165
11.4 Simulating Perceptual Effects . . . 166
11.4.1 Scotopic Vision . . . 166
11.4.2 Visual Acuity . . . 167
11.4.3 Veiling Luminance . . . 168
11.4.4 Tone Mapping with Perceptual Effects . . . 169
11.5 Bilateral Tone Mapping for HDRC Video . . . 170
11.6 Summary . . . 175

12 HDR Image and Video Compression
Rafał Mantiuk . . . 179
12.1 Introduction . . . 179
12.2 Device-Referred and Scene-Referred Representation of Images . . . 180
12.3 HDR Image and Video Compression Pipeline . . . 180
12.4 HDR Image Formats . . . 181
12.4.1 Radiance's HDR Format . . . 181
12.4.2 LogLuv TIFF . . . 182
12.4.3 OpenEXR . . . 183
12.4.4 Subband Encoding – JPEG HDR . . . 183
12.5 HDR Extension to MPEG Video Compression . . . 184
12.6 Perceptual Encoding of HDR Color . . . 187
12.7 Software for HDR Image and Video Processing . . . 191
References . . . 191

13 HDR Applications in Computer Graphics
Michael Goesele and Karol Myszkowski . . . 193
13.1 Introduction . . . 193
13.2 Capturing HDR Image Data . . . 194
13.2.1 Multiexposure Techniques . . . 194
13.2.2 Photometric Calibration . . . 194
13.3 Image-Based Object Digitization . . . 196
13.3.1 Image-Based Capture of Spatially Varying BRDFs . . . 196
13.3.2 Acquisition of Translucent Objects . . . 197
13.4 Image-Based Lighting in Image Synthesis . . . 199
13.4.1 Rendering Techniques for Image-based Lighting . . . 200
13.4.2 A CAVE System for Interactive Global Illumination Modeling in Car Interior . . . 203
13.4.3 Interactive Lighting in Mixed Reality Applications . . . 205
13.5 Requirements for HDR Camera Systems . . . 206
References . . . 208

14 High-Dynamic Range Displays
Helge Seetzen . . . 211
14.1 HDR Display Requirements . . . 211
14.2 HDR Display Design . . . 213
14.2.1 LED Backlight . . . 215
14.2.2 LCD Panel . . . 216
14.2.3 Image Processing Algorithm . . . 216
14.3 HDR Display Performance . . . 221
14.4 Alternative Implementation . . . 222
14.5 Conclusion . . . 222
