1	Introduction	1
2	General Remarks	3
3	Preparation and Properties	5
4	Kinetic Studies	17
4.1	Hydroboration Kinetics of Alkenes	18
4.2	Hydroboration Kinetics of Alkynes	27
4.2.1	Relative Rates between Monohydroboration and Dihydroboration of Alkynes	30
4.3	Hydroboration Kinetics of Haloalkenes	31
4.4	Hydroboration Kinetics of Haloalkynes	38
4.5	Reduction Kinetics	41
4.6	Kinetics of Complex Formation	48
4.7	Kinetics of Protonolysis	51
5	Hydroboration	59
5.1	Hydroboration of Alkenes	59
5.1.1	Hydroboration of Acyclic Alkenes	59
5.1.1.1	Terminal Olefins	61
5.1.1.2	Internal Olefins	61
5.1.1.3	<i>cis</i> and <i>trans</i> Isomers	62
5.1.1.4	Effect of α -Methyl Substituents	64
5.1.1.5	Effect of α -Conjugated Substituents	65
5.1.2	Hydroboration of Cyclic Alkenes	68
5.1.3	Hydroboration of Chloro-, Acetate-, and Acetal-Functionalized Alkenes	73
5.1.4	Hydroboration of Allylsilanes	76
5.1.5	Hydroboration of Chiral Allyl Amines and Chiral Allyl Alcohols	78
5.1.6	Hydroboration of Alkenylheterocycles	84
5.1.7	Hydroboration of Enamines	96
5.1.8	Hydroboration of Heterocyclic Olefins	99
5.2	Hydroboration of Alkynes	111
5.2.1	Hydroboration of 1-Alkynes	112

5.2.2	Hydroboration of 1-Silyl-2-Alkyl-1-Alkynes	116
5.2.3	Hydroboration of 1-Halo-1-Alkynes	120
5.3	Hydroboration of Dienes	126
5.4	Hydroboration of Allenes	130
5.5	Hydroboration of Enynes and Diynes	136
6	Synthesis of Alcohols	143
6.1	Synthesis of Saturated Alcohols	143
6.2	Synthesis of Allylic Alcohols	153
6.3	Synthesis of Homoallylic Alcohols	155
6.4	Synthesis of Propargylic Alcohols	163
6.5	Synthesis of Homopropargylic Alcohols	166
6.6	Synthesis of Silyl Alcohols	172
6.6.1	Saturated Alcohols	173
6.6.2	Allylic Alcohols	175
6.6.3	Homoallylic Alcohols	177
6.6.4	Homopropargylic Alcohols	179
6.6.5	Diyne Alcohols	180
6.6.6	Endiyne Alcohols	181
6.6.7	Diendiyne Alcohols	181
6.6.8	Allenic Alcohols	183
6.6.9	Allenene Alcohols	186
6.6.10	Allenyne Alcohols	187
6.6.11	Allendienyne Alcohols	188
6.7	Synthesis of Heterocyclic Alcohols	188
6.8	Synthesis of Amino Alcohols	193
6.9	Asymmetric Synthesis of Alcohols	194
7	Synthesis of Aldehydes and Ketones	213
7.1	Synthesis of Aldehydes	213
7.2	Synthesis of Ketones	219
7.2.1	Synthesis of Saturated and Aromatic Ketones	219
7.2.2	Synthesis of Enones	227
7.2.2.1	Synthesis of (<i>E</i>)- β - γ -Enones	227
7.2.2.2	Synthesis of γ,δ -Enones	227
7.2.3	Synthesis of γ,δ -Ynones	229
7.2.4	Synthesis of Dienones	231
7.2.5	Synthesis of Conjugated Enynones	231
7.2.6	Synthesis of β -Ketosilanes	233
7.2.7	Synthesis of 1-Metallacyclohexan-4-ones	233
7.2.8	Synthesis of Chiral Ketones	234
8	Synthesis of Carboxylic Acids	237
8.1	Synthesis of Unsaturated Acids	237
8.2	Synthesis of β -Amino Acids	237

9	Synthesis of Esters	241
9.1	Synthesis of Achiral Esters	241
9.2	Synthesis of Chiral Esters	242
9.3	Synthesis of (<i>E</i>)- β,γ -Unsaturated Esters	246
9.4	Synthesis of α -Amino Acid Esters	248
10	Synthesis of Nitriles	253
10.1	Synthesis of Achiral Nitriles	253
10.2	Synthesis of Chiral Nitriles	255
10.3	Synthesis of (<i>E</i>)- β,γ -Unsaturated Nitriles	257
11	Synthesis of (<i>E</i>)-β,γ-Unsaturated Amides	259
12	Synthesis of Amines	261
12.1	Synthesis of Chiral Amines	261
12.2	Synthesis of Homopropargylic Amines	266
12.3	Synthesis of Secondary Amines	267
13	Synthesis of Halides	271
13.1	Synthesis of Halides <i>via</i> Hydroboration	271
13.2	Synthesis of Halides <i>via</i> Haloboration	273
13.2.1	Synthesis of 2-Halo-1-Alkenes	273
13.2.2	Synthesis of (<i>Z</i>)-1-Alkynyl-2-Halo-1-Alkenes	276
13.2.3	Synthesis of (<i>Z</i>)- δ -Halo- γ,δ -Unsaturated Ketones	277
14	Synthesis of Dialkylsulfides	283
15	Synthesis of Thiophene Oligomers	285
16	Synthesis of Cyclopropanes and Cyclobutanes	287
17	Synthesis of Borinanes	291
18	Synthesis and Transformations of Butterflyboranes: <i>cis</i>-Bicyclo[3.3.0]oct-1-yl-dialkylboranes	297
19	Synthesis of α-Bromoboranes	303
20	Synthesis of Borinates	307
20.1	Enol Borinates	307
20.1.1	Synthesis of (<i>E</i>)- and (<i>Z</i>)-Enolborinates from Saturated Ketones	307
20.1.2	Stereoselective Synthesis of (<i>Z</i>)-Enol Borinates from α,β - Unsaturated Ketones	312
20.1.3	Synthesis of Stable <i>cis</i> - <i>B</i> -Vinyl-9-Oxa-10-Borabicyclo[3.3.2]decane (<i>cis</i> - <i>B</i> -Vinyl-OBBD) Derivatives	313

20.1.4	Synthesis of Stable <i>trans</i> - <i>B</i> -Vinyl-9-Oxa-10-Borabicyclo[3.3.2]decane (<i>trans</i> - <i>B</i> -Vinyl-OBBD)	314
20.1.5	Markovnikov Vinylborinates: Synthesis of <i>B</i> -Vinyl-9-Oxa-10-Borabicyclo[3.3.2]decane (Vinyl-10-OBBD)	314
20.2	Synthesis of Alkynylborinates	316
21	Synthesis and Transformation of Polymers	321
22	Synthesis of Alkali Metal 9-Boratabicyclo[3.3.1]nonane (Li, K, and Na 9-BBNH)	323
23	Synthesis of <i>B</i>-R-9-BBN Not Available <i>via</i> Hydroboration ...	327
24	Synthesis of Unsaturated Compounds	337
24.1	Synthesis of Alkenes	337
24.1.1	Synthesis of Acyclic, Cyclic, and Heterocyclic Alkenes	337
24.1.2	Synthesis of (<i>Z</i>)-Alkenylsilane and (<i>Z</i>)-Alkenyltin	347
24.1.3	Synthesis of (<i>Z</i>)-1-Halo-1-Alkenes	351
24.2	Synthesis of Dienes	352
24.2.1	Synthesis of 1, ω -Dienes	352
24.2.2	Synthesis of Internal 1,3-Dienes	361
24.2.3	Synthesis of Nitrogen-Containing Heterocyclic (<i>Z</i>)-1,3-Dienes ..	364
24.2.4	Synthesis of Sulfur-Substituted 1,3-Dienes	366
24.2.5	Synthesis of Stannyl Dienes	368
24.2.6	Synthesis of <i>B</i> -Isoprenyl Derivatives	369
24.3	Synthesis of Enynes	370
24.3.1	Stereoselective Synthesis of Conjugated (<i>E</i>)- and (<i>Z</i>)-Enynes	370
24.3.2	Stereoselective Synthesis of Silylated (<i>E</i>)- and (<i>Z</i>)-Enynes	371
24.4	Synthesis of Endiynes	373
24.4.1	Stereoselective Synthesis of (<i>E</i>)- and (<i>Z</i>)-Endiynes	373
24.4.2	Stereoselective Synthesis of (<i>E</i>)- and (<i>Z</i>)-Silylated Endiynes	373
24.5	Synthesis of 5-Methylene-1,3-Cyclohexadienes (<i>o</i> -Isotoluenes) and 1,2,4,6-Heptatetraenes: (Diene-Allenenes)	375
24.6	Synthesis of Enyne-Allenenes, Dienyne-Allenenes, and Trienyne-Allenenes, and Their Cycloisomerization	376
24.7	Synthesis of Silylated <i>Z,Z</i> -Diendiynes and <i>Z,Z,Z,Z</i> -Tetraentetraynes, and Their Cycloisomerization	381
25	Reduction	397
25.1	With 9-BBN·THF	397
25.2	With 9-BBN·Py	408
25.3	With Li 9-BBNH	410
25.4	With <i>B</i> -Siamyl-9-BBN	414
25.5	With Lithium 9,9-Di- <i>n</i> -Butyl-9-Borabicyclo[3.3.1]nonanate	415
25.6	With 9-BBN Derivatives (as Catalysts)	422

26	Asymmetric Reduction	427
26.1	Alpine-Borane	428
26.1.1	Reduction of Aldehydes	428
26.1.2	Reduction of Ketones	433
26.1.2.1	Reduction with Alpine-Borane, under Pressure	433
26.1.2.2	Reduction with Alpine-Borane as Neat or in Excess	437
26.1.2.3	Reduction of Prochiral Ketones	437
26.1.2.4	Reduction of α -Haloketones	441
26.1.2.5	Reduction of Ketoesters	442
26.1.2.6	Reduction of α,β -Unsaturated Ketones	444
26.1.2.7	Reduction of Propargyl Ketones	445
26.1.2.8	Reduction of Propargylic Ketones with α -Chiral Centers	449
26.1.2.9	Reduction of Acylcyanide	451
26.2	NB-Enantrane	452
26.3	Eapine-Borane and Prapine-Borane	453
26.4	NB-Enantride	459
26.5	Eapine-Hydride	461
26.6	K-Glucoride	462
26.7	K-Xylide	468
26.8	K9-OThx-9-BBNH	472
26.9	Lithium Di- <i>n</i> -Butyl Ate Complex of 9-BBN	473
26.10	Li 9-BBNH	475
26.11	Comparative Data of Asymmetric Reducing Agents	476
27	Cleavage of Ethers	487
28	<i>trans</i>-Metalation	491
29	Separation of Isomers	499
30	Diels-Alder Reaction	501
31	Suzuki Reaction	523
31.1	Mechanism of the Suzuki Catalytic Cycle	554
32	Miscellaneous Reactions	559
	Subject Index	573
