

# Contents

<b>Mathematical Tools for Pattern Formation</b> <i>G. Dangelmayr and L. Kramer</i> .....	1
<b>Formation of Dynamical Structures in Axisymmetric Fluid Systems</b> <i>F.H. Busse, G. Pfister and D. Schwabe</i> .....	86
<b>Pattern Formation in Binary Fluid Convection and in Systems with Throughflow</b> <i>M. Lücke, W. Barten, P. Büchel, C. Fütterer, St. Hollinger and Ch. Jung</i> .....	127
<b>Dynamical Structures in Open Fluid Systems</b> <i>D. Rempfer</i> .....	197
<b>Theoretical and Experimental Investigations of the Faraday Instability</b> <i>H.W. Müller, R. Friedrich and D. Papathanassiou</i> .....	230
<b>Pattern Formation in an Inhomogeneous Environment</b> <i>W. Zimmermann, B. Painter and R. Behringer</i> .....	266
<b>Electrically Driven Instabilities in Smectic Liquid Crystal Films</b> <i>H. Pleiner, R. Stannarius and W. Zimmermann</i> .....	295
<b>Electrohydrodynamic Convection in Nematics</b> <i>W. Pesch and U. Behn</i> .....	335
<b>Dynamics of Patterns of Chemical Reactions on Surfaces</b> <i>R. Imbühl, H. Engel and M. Eiswirth</i> .....	384
<b>Convection and Pattern Formation Induced by Autocatalytic Chemical Reactions</b> <i>H.R. Brand and S.C. Müller</i> .....	411

<b>Formation of Spatio-Temporal Structures in Semiconductors</b> <i>E. Schöll, F.J. Niedernostheide, J. Parisi, W. Prettl and H.G. Purwins</i> .....	446
<b>Formation of Patterns in Granular Materials</b> <i>A. Betat, C.M. Dury, I. Rehberg, G.H. Ristow, M.A. Scherer, M. Schröter and G. Straßburger</i> .....	495
<b>Spontaneous Generation of Magnetic Fields in the Laboratory</b> <i>F.H. Busse, U. Müller, R. Stieglitz and A. Tilgner</i> .....	546
<b>From Single Cells to a Multicellular Organism: The Development of the Social Amoebae <i>Dictyostelium Discoideum</i></b> <i>B.N. Vasiev and C.J. Weijer</i> .....	559
