## Contents

<b>Part I: Background and the Problem Setting</b>	<b>1</b>
<b>1 Symplectic Reduction</b>	<b>3</b>
1.1 Introduction to Symplectic Reduction . . . . .	3
1.2 Symplectic Reduction – Proofs and Further Details . . . . .	12
1.3 Reduction Theory: Historical Overview . . . . .	24
1.4 Overview of Singular Symplectic Reduction . . . . .	36
<b>2 Cotangent Bundle Reduction</b>	<b>43</b>
2.1 Principal Bundles and Connections . . . . .	43
2.2 Cotangent Bundle Reduction: Embedding Version . . . . .	59
2.3 Cotangent Bundle Reduction: Bundle Version . . . . .	71
2.4 Singular Cotangent Bundle Reduction . . . . .	88
<b>3 The Problem Setting</b>	<b>101</b>
3.1 The Setting for Reduction by Stages . . . . .	101
3.2 Applications and Infinite Dimensional Problems . . . . .	106
<b>Part II: Regular Symplectic Reduction by Stages</b>	<b>111</b>
<b>4 Commuting Reduction and Semidirect Product Theory</b>	<b>113</b>
4.1 Commuting Reduction . . . . .	113
4.2 Semidirect Products . . . . .	119

4.3	Cotangent Bundle Reduction and Semidirect Products . . . . .	132
4.4	Example: The Euclidean Group . . . . .	137
<b>5</b>	<b>Regular Reduction by Stages</b>	<b>143</b>
5.1	Motivating Example: The Heisenberg Group . . . . .	144
5.2	Point Reduction by Stages . . . . .	149
5.3	Poisson and Orbit Reduction by Stages . . . . .	171
<b>6</b>	<b>Group Extensions and the Stages Hypothesis</b>	<b>177</b>
6.1	Lie Group and Lie Algebra Extensions . . . . .	178
6.2	Central Extensions . . . . .	198
6.3	Group Extensions Satisfy the Stages Hypotheses . . . . .	201
6.4	The Semidirect Product of Two Groups . . . . .	204
<b>7</b>	<b>Magnetic Cotangent Bundle Reduction</b>	<b>211</b>
7.1	Embedding Magnetic Cotangent Bundle Reduction . . . . .	212
7.2	Magnetic Lie-Poisson and Orbit Reduction . . . . .	225
<b>8</b>	<b>Stages and Coadjoint Orbits of Central Extensions</b>	<b>239</b>
8.1	Stage One Reduction for Central Extensions . . . . .	240
8.2	Reduction by Stages for Central Extensions . . . . .	245
<b>9</b>	<b>Examples</b>	<b>251</b>
9.1	The Heisenberg Group Revisited . . . . .	252
9.2	A Central Extension of $L(S^1)$ . . . . .	253
9.3	The Oscillator Group . . . . .	259
9.4	Bott–Virasoro Group . . . . .	267
9.5	Fluids with a Spatial Symmetry . . . . .	279
<b>10</b>	<b>Stages and Semidirect Products with Cocycles</b>	<b>285</b>
10.1	Abelian Semidirect Product Extensions: First Reduction . . . . .	286
10.2	Abelian Semidirect Product Extensions: Coadjoint Orbits . . . . .	295
10.3	Coupling to a Lie Group . . . . .	304
10.4	Poisson Reduction by Stages: General Semidirect Products . . . . .	309
10.5	First Stage Reduction: General Semidirect Products . . . . .	315
10.6	Second Stage Reduction: General Semidirect Products . . . . .	321
10.7	Example: The Group $\mathcal{T} \circledast \mathcal{U}$ . . . . .	347
<b>11</b>	<b>Reduction by Stages via Symplectic Distributions</b>	<b>397</b>
11.1	Reduction by Stages of Connected Components . . . . .	398
11.2	Momentum Level Sets and Distributions . . . . .	401
11.3	Proof: Reduction by Stages II . . . . .	406

<b>12 Reduction by Stages with Topological Conditions</b>	<b>409</b>
12.1 Reduction by Stages III . . . . .	409
12.2 Relation Between Stages II and III . . . . .	416
12.3 Connected Components of Reduced Spaces . . . . .	419
Conclusions for Part I. . . . .	420
<hr/>	
<b>Part III: Optimal Reduction and Singular Reduction by Stages, by Juan-Pablo Ortega</b>	<b>421</b>
<hr/>	
<b>13 The Optimal Momentum Map and Point Reduction</b>	<b>423</b>
13.1 Optimal Momentum Map and Space . . . . .	423
13.2 Momentum Level Sets and Associated Isotropies . . . . .	426
13.3 Optimal Momentum Map Dual Pair . . . . .	427
13.4 Dual Pairs, Reduced Spaces, and Symplectic Leaves . . . . .	430
13.5 Optimal Point Reduction . . . . .	432
13.6 The Symplectic Case and Sjamaar's Principle . . . . .	435
<b>14 Optimal Orbit Reduction</b>	<b>437</b>
14.1 The Space for Optimal Orbit Reduction . . . . .	437
14.2 The Symplectic Orbit Reduction Quotient . . . . .	443
14.3 The Polar Reduced Spaces . . . . .	446
14.4 Symplectic Leaves and the Reduction Diagram . . . . .	454
14.5 Orbit Reduction: Beyond Compact Groups . . . . .	455
14.6 Examples: Polar Reduction of the Coadjoint Action . . . . .	457
<b>15 Optimal Reduction by Stages</b>	<b>461</b>
15.1 The Polar Distribution of a Normal Subgroup . . . . .	461
15.2 Isotropy Subgroups and Quotient Groups . . . . .	464
15.3 The Optimal Reduction by Stages Theorem . . . . .	466
15.4 Optimal Orbit Reduction by Stages . . . . .	470
15.5 Reduction by Stages of Globally Hamiltonian Actions . . . . .	475
Acknowledgments for Part III. . . . .	481
<b>Bibliography</b> . . . . .	<b>483</b>
<b>Index</b> . . . . .	<b>509</b>
