Part I Petroleum Exploration Methods

1	Introduction—Petroleum Hydrocarbons	3
1.1	Historical Aspect	3
1.2	Petroleum Occurrence and Chemical Composition	3
1.3	Properties of Crude Oils	4
1.4	Natural Gas—Definition	4
1.5	Petroleum Hydrocarbon Non-Reservoir Rocks	5
1.6	Petroleum Reservoir Rocks	5
1.7	Petroleum Migration and Accumulation	5
1.7.1	Introduction	5
1.7.2	Oil Migration	6
1.7.3	The Role of Connate Water	6
1.7.4	Differential Entrapment of Petroleum Hydrocarbons— Gussow Theory	6
1.7.5	Petroleum Accumulation	7
1.8	The Capacity of Oil and Gas Traps	8
1.9	Petroleum Province—Definition	9
	References	9
2	Sedimentary Basins and Plate Tectonics	11
2.1	Scope	11
2.2	Continental Shelves	12
2.3	Plate Interactions	12
2.4	Development of Sedimentary Basins	14
2.4.1	Geodynamic Settings of Sedimentary Basins	15
2.4.2	Sedimentary Basins and Hydrocarbon Occurrences	16
2.5	Oil Migration and Subduction	17
2.6	Rifted-Margin Sediment Prisms	17
	References	19
3	Surface Geophysical Petroleum Exploration Methods	21
3.1	Introduction	21

3.2	Magnetic Survey	21
3.3	Gravimetric Survey	21
3.4	Seismic Exploration Survey	22
3.4.1	General	22
3.4.2	Seismic Refraction Methods	22
3.4.3	Seismic Reflection Method	22
3.5	Land-Satellite Images in Salt Dome Exploration	23
	References	23
4	Drilling Technology in Petroleum Geology	25
4.1	Introduction	25
4.2	Petroleum Drilling Operations	27
4.2.1	Discussion	27
4.2.2	Types of Drilling Operations	28
4.3	Drilling Fluids	29
4.3.1	Properties of Drilling Muds	29
4.3.2	Composition and Nature of the Drilling Fluids	29
4.3.3	Mud Systems in Salt Structures	30
4.3.4	Salt Dome Drilling	31
4.4	Drilling Hazards	31
4.5	Drill Stem Testing (DST)	31
4.5.1	Scope	31
4.5.2	Discussion	32
4.6	General Remarks	33
4.6.1	About the DST—Procedure	33
4.6.2	Required Conditions and Reasons for Carrying Out a DST in a Petroleum Reservoir Formation	34
	References	40
5	Geophysical Well Logging Methods of Oil and Gas Reservoirs	41
5.1	Introduction	41
5.2	Borehole Parameters and Rock Properties	41
5.3	Resistivity Measurements by Well Electric Logs	43
5.3.1	Definition	43
5.3.2	Annulus and Resistivity Profiles—Hydrocarbon Zone	43
5.4	Formation Temperature (T_f)	44
5.5	Specific Log Types	45
5.5.1	Spontaneous Potential Logs (SP)	45
5.5.2	Resistivity Logs (R)	45
5.5.3	Porosity Logs	48
5.5.4	Gamma Ray Logs	50
5.6	Well Design and Well Type Completions	51
5.6.1	Scope	51
5.6.2	Open Hole Completions	52
5.6.3	Perforated Completions	52
5.6.4	Screening Techniques	52
5.6.5	Other Type Well Completions	54
	References	54

Part II A Guide to Lithostratigraphic Correlation Charts – A Model Type/North Africa

6	A Lithostratigraphic Correlation Chart—A Model Type/North Africa	57
6.1	Introduction	57
6.1.1	Aspect	57
6.1.2	Petroleum Perspective	58
6.2	Geology of Algeria	61
6.2.1	Tectonic History	61
6.2.2	Structural Geology of Algeria	61
6.2.3	Geologic Provinces of the Algerian Sahara	63
6.2.4	An Approach to a Computerized Lithostratigraphic Chart in North Africa	66
6.2.5	Stratigraphy of the Algerian Saharan Platform	71
6.2.6	A Geological Study of An Exploratory Well at the Eastern Border of the Algerian Sahara (Ry-1)	72
6.3	Petroleum Geology of the Libyan Sahara	72
6.3.1	Scope	72
6.3.2	Stratigraphy of Sebha Area West of Libya	74
6.4	Petroleum Geology of Egypt, Northeast Africa	76
6.4.1	The Western Desert of Egypt	76
6.4.2	Geological Results of the Petroleum Exploration of the Assiut-Kharga Well	79
6.4.3	The Nile Delta of Egypt	81
6.4.4	The Gulf of Suez Region, Egypt	83
6.5	Economic Aspects of Salt Structures	87
	References	87
	Appendix	89
7	The Petrodata DataBase System	91
7.1	Scope	91
7.2	The Petrodata System	91
7.2.1	Historical Aspect	91
7.2.2	Classification of the Petrodata System	92
7.3	Economic Aspects	98
7.4	Recommendation	98
7.5	A Type Computerized Montage Drilling Report of an Exploratory Well (Boumahni well “Bi-1”)	99
7.6	Appendix A	101
	References	106
	Glossary	107
	Index	111
