## 1 Geometry of State Spaces

<i>A. Uhlmann, B. Crell</i> .....	1
1.1 Introduction .....	1
1.2 Geometry of Pure States .....	4
1.2.1 Norm and Distance in Hilbert Space .....	4
1.2.2 Length of Curves in $\mathcal{H}$ .....	4
1.2.3 Distance and Length .....	6
1.2.4 Curves on the Unit Sphere .....	7
1.2.5 Phases .....	9
1.2.6 Fubini–Study Distance .....	10
1.2.7 Fubini–Study Metric .....	12
1.2.8 Symmetries .....	13
1.2.9 Comparison with Other Norms .....	15
1.3 Operators, Observables, and States .....	16
1.3.1 States and Expectation Values .....	17
1.3.2 Subalgebras and Subsystems .....	19
1.3.3 Classification of Finite Quantum Systems .....	23
1.3.4 All Subsystems for $\dim \mathcal{H} < \infty$ .....	32
1.4 Transition Probability, Fidelity, and Bures Distance .....	35
1.4.1 Purification .....	36
1.4.2 Transition Probability and Fidelity .....	37
1.4.3 Optimization .....	38
1.4.4 Why the Bures Distance Is a Distance .....	40
1.4.5 Expressions for Fidelity and Transition Probability .....	43
1.4.6 Estimates and a “Hidden Symmetry” .....	47
1.4.7 “Operational Fidelity” .....	49
1.5 Appendix: The Geometrical Mean .....	50
1.5.1 Geometric Mean and Fidelity .....	52
1.5.2 The Transformer Identity .....	53
1.5.3 $\#$ -Convexity .....	57
References .....	58

**2 Basic Concepts of Entangled States**

<i>F. Mintert, C. Viviescas, A. Buchleitner</i> .....	61
2.1 Introduction .....	61
2.2 Entangled States .....	61
2.2.1 Pure States .....	62
2.2.2 Mixed States .....	63
2.3 Separability Criteria .....	64
2.3.1 Pure States .....	64
2.3.2 Mixed States .....	66
2.4 Entanglement Monotones and Measures .....	71
2.4.1 General Considerations .....	71
2.4.2 Some Specific Monotones and Measures .....	78
References .....	86

**3 Topology and Quantum Computing**

<i>L.H. Kauffman, S.J. Lomonaco Jr.</i> .....	87
3.1 Introduction .....	87
3.2 Knots and Braids .....	90
3.3 Quantum Mechanics and Quantum Computation .....	94
3.3.1 What Is a Quantum Computer? .....	95
3.4 Braiding Operators and Universal Quantum Gates .....	96
3.4.1 Universal Gates .....	99
3.5 A Remark About EPR, Entanglement and Bell's Inequality .....	102
3.6 The Aravind Hypothesis .....	104
3.7 $SU(2)$ Representations of the Artin Braid Group .....	104
3.8 The Bracket Polynomial and the Jones Polynomial .....	110
3.8.1 The State Summation .....	113
3.8.2 Quantum Computation of the Jones Polynomial .....	114
3.8.3 The Hadamard Test .....	117
3.9 Quantum Topology, Cobordism Categories, Temperley–Lieb Algebra and Topological Quantum Field Theory .....	118
3.10 Braiding and Topological Quantum Field Theory .....	127
3.11 Spin Networks and Temperley–Lieb Recoupling Theory .....	135
3.11.1 Evaluations .....	140
3.11.2 Symmetry and Unitarity .....	141
3.12 Fibonacci Particles .....	145
3.13 The Fibonacci Recoupling Model .....	148
3.14 Quantum Computation of Colored Jones Polynomials and the Witten–Reshetikhin–Turaev Invariant .....	150
References .....	153

**4 Entanglement in Phase Space**

<i>A.M. Ozorio de Almeida</i> .....	157
4.1 Introduction .....	157
4.2 Entanglement and Classical Physics .....	160

4.3	Classical–Quantum Correspondence . . . . .	163
4.4	Semiclassical Quantum States . . . . .	169
4.5	Operator Representations and Double Phase Space . . . . .	175
4.6	The Wigner Function and the Chord Function . . . . .	182
4.7	The Partial Trace: Sections and Projections . . . . .	193
4.8	Generating a <i>Classical</i> Entanglement: The EPR State . . . . .	200
4.9	Entanglement and Decoherence . . . . .	206
4.10	A Semiclassical Picture of Entanglement . . . . .	208
	References . . . . .	215

**5 Introduction to Decoherence Theory**

	<i>K. Hornberger</i> . . . . .	221
5.1	The Concept of Decoherence . . . . .	221
	5.1.1 Decoherence in a Nutshell . . . . .	222
	5.1.2 General Scattering Interaction . . . . .	224
	5.1.3 Decoherence as an Environmental Monitoring Process . . . . .	225
	5.1.4 A Few Words on Nomenclature . . . . .	229
5.2	Case Study: Dephasing of Qubits . . . . .	230
	5.2.1 An Exactly Solvable Model . . . . .	230
	5.2.2 The Continuum Limit . . . . .	234
	5.2.3 Dephasing of $N$ Qubits . . . . .	237
5.3	Markovian Dynamics of Open Quantum Systems . . . . .	239
	5.3.1 Quantum Dynamical Semigroups . . . . .	240
	5.3.2 The Lindblad Form . . . . .	242
	5.3.3 Quantum Trajectories . . . . .	245
	5.3.4 Exemplary Master Equations . . . . .	249
5.4	Microscopic Derivations . . . . .	255
	5.4.1 The Weak Coupling Formulation . . . . .	255
	5.4.2 The Monitoring Approach . . . . .	259
	5.4.3 Collisional Decoherence of a Brownian Particle . . . . .	262
	5.4.4 Decoherence of a Quantum Dot . . . . .	267
5.5	Robust States and the Pointer Basis . . . . .	270
	5.5.1 Nonlinear Equation for Robust States . . . . .	271
	5.5.2 Applications . . . . .	273
	References . . . . .	274

**6 Diffusive Spin Transport**

	<i>C.A. Müller</i> . . . . .	277
6.1	Introduction . . . . .	277
6.2	Spin Relaxation . . . . .	278
	6.2.1 Spin – A Primer on Rotations . . . . .	279
	6.2.2 Master Equation Approach to Spin Relaxation . . . . .	282
	6.2.3 Irreducible Scalar Spin Relaxation Rates . . . . .	287
6.3	Diffusion . . . . .	294
	6.3.1 Transport . . . . .	294

6.3.2 Momentum – a Primer on Translations ..... 295

6.3.3 Master Equation Approach to Diffusion ..... 296

6.3.4 Linear Response and Diffusion Constant ..... 303

6.4 Diffusive Spin Transport ..... 306

6.4.1 Master Equation Approach to Diffusive Spin Transport ... 306

6.4.2 Quantum Corrections ..... 309

References ..... 312

**Index** ..... 315
