

Contents

List of Figures	XI
List of Tables	XIII
List of Abbreviations	XV
1 Introduction.....	1
1.1 Motivation.....	1
1.2 Research Questions and Aims	3
1.3 Literature Review	4
1.4 Definition of Renewable Energy	11
1.5 Research Design and Methodology	13
1.6 Outline	17
2 Government Intervention in Renewable Electricity Markets.....	19
2.1 Characteristics of Electricity Markets and Renewable Energy Technologies...20	
2.2 Main Justification for Intervention: Market Failure	22
2.2.1 Monopolistic Competition and Cartels	23
2.2.2 Externalities.....	23
2.2.3 Forms of Externalities	24
2.2.3.1 Pigovian Taxes	27
2.2.3.2 Coase Theorem	28
2.2.4 Information Asymmetry	29
2.3 The Risk of Government Failure	30
2.3.1 Capture Theory.....	31
2.3.2 Imperfect Information of the Regulator	32
2.4 Industrial Policy Approaches.....	32
2.4.1 The Competitiveness “Problem”	34
2.4.1.1 The Perspective of Traditional Trade Models.....	35
2.4.1.2 The Perspective of New Trade Theory	36
2.4.1.3 Porter’s Diamond Model.....	39
2.4.2 Infant Industry Argument.....	41
2.4.3 First-Mover Advantages.....	44
2.4.3.1 First-Mover Advantages and Environmental Innovation	45
2.4.3.2 First-Mover Advantages and Renewable Energy Industries	46
2.4.3.3 Lead Markets.....	47
2.5 Summary and Conclusion.....	49

3	The Context of Renewable Energy Promotion.....	53
3.1	Key Drivers of Renewable Energy Use.....	53
3.1.1	Increased Energy Demand	54
3.1.2	The Limits of Fossil Fuels.....	55
3.1.3	Sustainability and Climate Change	56
3.2	Three Main Policy Objectives of Renewable Energy Policy	58
3.3	Generation Costs of Renewable Energy and External Costs of Electricity Generation	59
3.3.1	Factors Relevant for Decrease in Generation Costs.....	60
3.3.2	Quantifying External Costs of Electricity Production.....	62
3.4	Renewable Energy Policy Instruments	64
3.4.1	Price-Based Systems	66
3.4.2	Quantity-Based Systems and Tradable Certificates.....	69
3.5	Summary.....	71
4	National Markets and Promotion Policies for Renewable Energy Sources.....	73
4.1	Renewable Energy Policy Instruments in Germany	73
4.1.1	Renewable Electricity Targets	74
4.1.2	Renewable Energy Sources Act (EEG).....	75
4.1.3	Preferential Loans	79
4.1.4	Further Financial Incentives.....	80
4.2	Renewable Energy Policy Instruments in the United States	82
4.2.1	Renewable Electricity Target	83
4.2.2	Renewable Energy Policy Instruments at the Federal Level.....	83
4.2.2.1	Public Utility Regulatory Policies Act.....	84
4.2.2.2	Financial Incentives	84
4.2.2.3	Developments since 2007	86
4.2.3	State Level.....	87
4.2.3.1	Renewable Portfolio Standards (RPS).....	88
4.2.3.2	Public Benefit Funds.....	91
4.2.3.3	Net Metering.....	92
4.3	Renewable Energy Policy Instruments in Japan	94
4.3.1	Renewable Electricity Targets	95
4.3.2	Sunshine Project.....	96
4.3.3	Voluntary Purchase Agreements.....	97
4.3.4	Renewable Portfolio Standard.....	99
4.4	Government Renewable Energy R&D in Germany, Japan and the United States	101
4.4.1	Historical Development of Renewable Energy R&D	101
4.4.2	Share of Renewable Energy R&D in Total Energy R&D.....	104

4.4.3	The Distribution by Renewable Energy Technology	106
4.5	Summary on Renewable Energy Policies in Germany, Japan and the United States	109
4.6	National Markets for Renewable Electricity	112
4.6.1	Renewable Power Market Development in Germany	112
4.6.2	Renewable Power Market Development in the United States	116
4.6.3	Renewable Power Market Development in Japan.....	119
4.6.4	Comparison of Renewable Power Generation in Germany, Japan and the United States.....	122
4.6.5	Summary	127
4.7	Capacity to Induce a Decline in Generation Costs	129
4.8	Lessons for the Design of Renewable Energy Promotion Instruments	134

5 International Markets for Renewable Energy Technologies and Export Promotion Policies.....139

5.1	Public Promotion of Renewable Energy Technology Exports.....	139
5.1.1	Export Promotion of Renewable Energy Technologies	139
5.1.1.1	Renewable Technology Export Promotion in Germany	140
5.1.1.2	Renewable Technology Export Promotion in the United States	144
5.1.1.3	Renewable Technology Export Promotion in Japan.....	146
5.1.2	Restrictions of Renewable Energy Technologies Imports	149
5.2	International Markets for Renewable Energy Technologies.....	152
5.2.1	Methodology	153
5.2.1.1	Indicators.....	154
5.2.1.2	Identifying Renewable Energy Goods.....	159
5.2.1.3	Dual or Multiple Use.....	161
5.2.1.4	Relevant Trade Codes	161
5.2.2	Development by Renewable Energy Technology.....	165
5.2.2.1	Wind Power.....	168
5.2.2.2	Solar Photovoltaic	170
5.2.2.3	Hydro Power	172
5.2.2.4	Geothermal and Biomass Power	173
5.2.3	The Export Performance and the Level of Specialization of Germany, Japan and the United States in Renewable Energy Technologies	176
5.2.3.1	Exports Per Capita	180
5.2.3.2	Growth in Renewable Energy Trading	180
5.2.3.3	Destination of Exports and Sources of Imports	184
5.2.3.4	World Market Share.....	187
5.2.3.5	Share in National Exports	189
5.2.3.6	Revealed Comparative Advantage.....	191

5.3	Summary and Conclusions	196
6	Explaining Differences in the Renewable Energy Policy Approaches in Germany, the United States and Japan	201
6.1	Development of Domestic Environmental and Renewable Energy Policies ..	202
6.1.1	Development in Germany	202
6.1.2	Development in the United States	205
6.1.3	Development in Japan	209
6.2	Emphasis on Economic Benefits.....	213
6.2.1	Strong Renewable Energy Coalition in Germany	214
6.2.2	Less Emphasis on Economic Benefits of Renewable Energy Use in the United States and Japan.....	215
6.3	Conclusion.....	217
7	Summary and Conclusion: Implications for Renewable Energy Instruments and Markets	219
	Appendix.....	227
	Bibliography	245
