

Table of Content

1	IMAGES IN COMPUTER SCIENCE: CLARIFICATIONS REQUIRED	1
1.1	The Age of the Images	1
1.2	Toward Information Society	2
1.3	Images and Computers: The Digital Picture	4
1.4	Requirements for a Modern Computer Scientist	5
1.5	Determining the Goal	7
2	COMPUTATIONAL VISUALISTICS: SEEN FROM ITS ROOTS	9
2.1	Computer Science: Subject and Methodology	9
2.2	Visualistics and the Many Sciences of Pictures / Images	14
2.3	Computational Visualistics and the Data Type »Image«	16
3	PRELIMINARY CLARIFICATIONS FROM VISUALISTICS	21
3.1	Pictures on the Border: Overlooking a Wide Kingdom	22
3.2	A Synthetic Proposal: Images as "Perceptoid" Signs	30
3.2.1	»Sign« as Genus Proximum for Pictures	31
3.2.2	»Perceptoid« as Differentia Specifica for Pictorial Signs	34
3.2.3	A Note on "Natural Images", "Indices", and "Icons"	36
3.3	Image and Object	40
3.3.1	The Naïve Approach to Resemblance	41
3.3.2	The Act-Theoretic Basis of the Concept »Resemblance«	43
3.3.3	Perception, Deception, and Primary Object Constitution	45
3.4	Image and Language	48
3.4.1	Assertions, Identity, and Contexts	49
3.4.2	Communication Among Pre-Object Creatures	53
3.4.3	Context Builders and Referential Anchoring	55
3.4.4	Secondary Object Constitution: Sortal Concepts & Geometry	60
3.4.5	Pictures as Context Builders: Resemblance Once More	65
3.5	Image and Image User	69
3.5.1	Reflection Modes of Dealing with Pictures	69
3.5.2	The Game of Picture Making	73
3.5.3	Who Is Communicating with Whom?	76
3.5.4	Indirect Resemblances & Rhetoric Derivations	79
3.5.5	Reflective Communication & Pictures of Art	88
3.6	Conclusions for Computational Visualistics	90

4 THE GENERIC DATA TYPE »IMAGE«: GENERAL ASPECTS	93
4.1 The Organizational Principle of the Discussion	94
4.2 Syntactic Aspects	96
4.2.1 <i>Pictorial Resolution and the Identity of Images</i>	96
4.2.1.1 Density, Continuity, and Decidability	98
4.2.1.2 Syntactic Types of Pictures in Computers	99
4.2.2 <i>Remarks on Compositionality</i>	103
4.2.2.1 Composition of One Picture: Pictorial "Morphology"	104
4.2.2.2 Compositions With Pictures: Pictorial "Text Grammars"	108
4.2.3 <i>Some Notes on Formalizing Color</i>	110
4.2.4 <i>Syntactic Transformations and Image Processing</i>	113
4.2.5 <i>The Limitations of Pictorial Syntax</i>	115
4.3 Semantic Aspects	116
4.3.1 <i>Computer Graphics, Spatial Objects, and Perspective</i>	118
4.3.1.1 Sortal Objects and Geometric Models	118
4.3.1.2 Excursion into the Theory of Rational Argumentation	120
4.3.1.3 Reasoning with Spatial Objects	125
4.3.1.4 A Perspective on Perspectives	127
4.3.2 <i>Two Levels of Computer Vision: An Example</i>	130
4.3.2.1 Constructing Visual Gestalts – Or Finding Pixemes	131
4.3.2.2 Instantiating Object Schemata	135
4.3.2.3 Determining Configurations	138
4.3.2.4 Computer Vision and "Picture Understanding"	140
4.3.2.5 Reference Semantics and Pictorial Reference	142
4.3.3 <i>Embedding Semantics in Pragmatics</i>	147
4.4 Pragmatic Aspects	149
4.4.1 <i>Interactive Systems as a New Type of Media</i>	150
4.4.1.1 Media of Class IV	152
4.4.1.2 The Selection Problems: Content	155
4.4.1.3 The Selection Problems: Form	158
4.4.1.4 Combined Selection Problems for Choosing a Picture	161
4.4.2 <i>Anticipating the Unknown Beholders</i>	164
4.4.2.1 Remarks on the Purposes of Picture Uses	164
4.4.2.2 User Modeling for Pictures	169
4.4.2.3 Adaptation to the Pragmatics of Context-Building	175
4.4.3 <i>Authenticity and Media of Class IV</i>	179
4.4.3.1 Beholder Models and Authenticity	180
4.4.3.2 Authenticity as a Technical Problem: Syntactic Approaches	181
4.4.4 <i>Information Visualization and the Rhetorics of Structural Pictures</i>	185
4.4.4.1 On Source Domains and Target Domains	186
4.4.4.2 Finding Appropriate Visualization Parameters: An Overview	190
4.4.4.3 Interactive Visualizations	192
4.4.5 <i>Remarks on the Pragmatics of Computer Art</i>	194
4.4.5.1 Reflective Pictures and the Reflective Mode of Reception	195
4.4.5.2 Computer Art – Art with the Computer	198
4.4.5.3 Interactivity in Computer Art	201

5 CASE STUDIES: USING THE DATA TYPE »IMAGE«	211
5.1 Semantic Requests to Image Databases in IRIS	211
5.1.1 <i>Image Retrieval for Information Systems</i>	212
5.1.2 <i>Results and Queries</i>	216
5.2 Rhetorically Enriched Pictures	219
5.2.1 <i>Describing Style Parameters</i>	221
5.2.2 <i>The Heuristics of Predicative Naturalism</i>	222
5.2.3 <i>Example Application of the Heuristics</i>	223
5.3 A Border Line Case: Immersion	225
5.3.1 <i>Virtual Architectur: The Atmosphere Projekt</i>	227
5.3.2 <i>Types of Use of Virtual Architecture</i>	235
5.3.3 <i>The Virtual Institute of Image Science</i>	241
5.3.4 <i>Conclusions</i>	247
5.4 Another Border Line Case: Mental Images	248
5.4.1 <i>An Example Task: Understanding Reports From Absent Spatial Events</i>	248
5.4.2 <i>On the Cognitive Function of Mental Images</i>	251
5.4.3 <i>Building a Computer Model</i>	255
5.4.4 <i>Conclusions: The Data Type »Image« and Explaining Mental Images</i>	260
6 CONCLUSIONS – PERSPECTIVES	263
6.1 The Foundation of Computational Visualistics	263
6.2 The Components of the Data Structure »Image«	264
6.3 The Future of an Institutional Computational Visualistics	267
APPENDICES	269
A Notes	269
B References	269
C List of Figures	280
D List of Tables	285
E Name Index	286
F Subject Index	286
