

Contents

Part I Classification and Pathomechanisms

Basic Aspects of Allergy and Hypersensitivity Reactions	3
Isabella Pali-Schöll and Erika Jensen-Jarolim	
Pathogen Recognition and New Insights into Innate Immunity	19
Joel N. Kline	
New Nomenclature and Clinical Aspects of Allergic Diseases	31
S.G.O. Johansson	
IgE and the High-Affinity Receptor, FcεRI: The IgE–CD23 Interaction	43
Donald MacGlashan, Jr.	
Superantigens and Allergic Disease	59
Mark S. Schubert	
Immune Complexes: Normal Physiology and Role in Disease	79
Michael M. Frank and C. Garren Hester	
What Is New About Eosinophil Activation in Asthma and Allergic Disease	95
Akira Kanda, Junichi Chihara, Monique Capron, and David Dombrowicz	
Mast Cell and Basophils: Interaction with IgE and Responses to Toll like Receptor Activators	113
Jean S. Marshall, Michael G. Brown, and Ruby Pawankar	

T Cells in Allergic Disease	135
Catherine M. Hawrylowicz, Christopher Corrigan, and Alex Faith	
Role of NKT Cells in the Regulation of Ongoing Type 2 Immune Response	151
Christelle Faveeuw, Thomas Roumier, Monique Capron, and David Dombrowicz	
CD8+ T Cells Play a Key Role in the Development of Allergic Lung Inflammation	167
Nobuaki Miyahara and Erwin W. Gelfand	
Neutrophils and Their Mediators in Asthma and Allergic Disease	179
Kian Fan Chung	
Dendritic Cells, Macrophages and Monocytes in Allergic Disease	195
Alexander Faith, Christopher Corrigan, and Catherine M. Hawrylowicz	
Function of Dendritic Cell Subsets in Allergic Disease	209
Bart N. Lambrecht and Hamida Hammad	
Epithelial Cell-Mesenchymal Interaction, Epithelial-Leukocyte Interaction and Epithelial Immune-Response Genes in Allergic Disease	231
Stephen T. Holgate	
Role of Epidermal Growth Factor Receptor Cascade in Airway Epithelial Regulation of Mucus Production	249
Jay Nadel	
Epithelial Cell Innate Responses to Rhinovirus Infection	267
Jean Kim and Robert Schleimer	
The Role of Platelets in Allergy	285
Kristin N. Kornerup and Clive P. Page	
Expression and Function of Siglec-8 in Human Eosinophils, Basophils, and Mast Cells	297
Stephan von Gunten and Bruce S. Bochner	
Effects of Nitric Oxide on Mast Cells: Production, Functions, and Mechanisms of Action	315
Tae Chul Moon, Yokananth Sekar, and A. Dean Befus	

Histamine and Its Receptors 329
 Martin K. Church

**Adenosine: Its Contribution to Our Understanding in Airway
 Inflammation** 357
 Riccardo Polosa

Airway Smooth Muscle Dysfunction in Asthma 377
 Maria B. Sukkar and Kian Fan Chung

**Genetic Variation in Cytokines, Asthma, and Atopy:
 The Role of IL-4/IL-13 Pathway Polymorphisms** 401
 Michaela Schedel and Michael Kabesch

**Allergy and the Bone Marrow: Transmigration Pathways
 of Hemopoietic Progenitor Cells from the Bone Marrow** 421
 Roma Sehmi, Jennifer V. Thomson, and Adriana Catalli

Hemopoietic Mechanisms in Allergic Rhinitis and Asthma 433
 Gail M. Gauvreau and Roma Sehmi

Part II Allergy and the Nervous System

Neuroanatomy of the Airways 457
 John Widdicombe

**Biology of Neurotrophins, Neuropeptides, and Muscarinic
 Receptors in Asthma** 469
 Sanchaita Sonar and Harald Renz

Neural Regulation of the Immune Response 493
 Paul Forsythe and John Bienenstock

Neuroregulation of Mucosal Vasculature 515
 Alfredo Chetta, Giovanna Pisi, and Dario Olivieri

Part III Allergy and Mucosal Immunology

Mucosal Immunity: from Allergy to Coeliac Disease 529
 Per Brandtzaeg

**Mucosa-Associated Lymphoid Tissue and Dynamics
of Lymphoid Cells in the Five Different Compartments
in Allergic Diseases..... 563**
Satoshi Fukuyama, Takahiro Nagatake, and Hiroshi Kiyono

Index..... 603
